Akrapovič Exhausts

Akrapovič is the market-leading manufacturer of premium exhaust systems for motorcycles and performance cars. A pioneer in the innovative use of titanium and super-alloys, Akrapovič is at the forefront of carbon-fibre component manufacture. Akrapovič exhaust systems are renowned for increasing performance, an unmistakable sound, innovative design, lightweight construction, quality workmanship, and durability. Founded in Slovenia over 25 years ago by former motorcycle racer Igor Akrapovič, the brand has grown to international prominence. The brand is synonymous with the highest level of design, performance enhancement and the creation of an unmistakable deeply resonant exhaust sound. The company's products are designed and manufactured by a passionate and highly-skilled workforce of over 800 employees using the latest technology, processes and finest materials. The Racing R&D department works with dozens of racing teams. Over 90 world champions have already relied on Akrapovič exhaust systems and this is just the beginning of a long and exciting ride.

•Significant horsepower increases • Massively reduced weight over standard • Exquisite build quality ensuring easy installation, durability & longevity • F.I.M. / EC approved noise levels with a "quality" sound • Spare parts availability to maintain and protect your investment.

Yoshimura Exhausts - The leader in performance

It's been nearly 60 years since 'Pops' Yoshimura started tuning motorcycles, and for six decades the name Yoshimura has been synonymous with racing, speed and success.

The racetrack is where Yoshimura lives and breathes – and earns its reputation – and front running racers trust Yoshimura because they know the work's been done and that the results will follow. The same is true for the road rider – every Yoshimura end-can and exhaust system has been through an extensive research and testing programme which guarantees great performance, fit and quality. The end result is complete satisfaction and that's what matters to Yoshimura most of all.

HEPTA FORCE

R11 DUAL EXIT

Scorpion Exhausts

Scorpion bring together traditional engineering excellence with the latest technology to produce an exciting range of high performance exhausts that all feature GREAT QUALITY, GREAT SOUND & GREAT POWER.

Scorpion obtain new models as soon as they become available. Then it's straight into the Dyno room where the bike is tested with the O.E.M. exhaust still fitted to see where improvements can be made - not just in power and torque, but also ground clearance, ease of fitment, weight saving and looks. Each Scorpion exhaust is specifically designed for the particular application. Scorpion exhausts are designed to boost power, not just at peak revs, but throughout the RPM range, giving better throttle response and improved overall performance - especially in the mid-range. All Scorpion exhausts come with a lifetime guarantee.

< Serket Parallel

A unique precision formed 6 facet profile and an aerospace derived multi composite claw contoured outlet.

< Serket Taper

A unique precision formed 6 facet tapering profile for improved ground clearance and an aero-space derived multi composite claw contoured outlet.

< Factory

All the performance benefits of a Scorpion silencer but with an OE Plus look, the overall effect faithful to the replaced OE product but with added performance and an understated style.

< Stealth

For bikes with an underseat exhaust fitted as standard the Stealth brings performance gains you can feel and great looks to the business end of the exhaust.

Sleeve Materials Available:
ST/STEEL = Polished stainless
Ti = Titanium
Carbon = Carbon Fibre

< Power Cone

A road legal race silencer with flared oval construction for extra ground clearance.

< RP-1 GP

Titanium/carbon fibre construction gives bolt on performance with huge power gains & weight savings over the OE silencer. Designed for race use but is road legal for most applications.

< Carbine Oval

A compact version of the factory silencer, shorter, lighter and more potent. The Carbine is the sawn off shotgun of the Scorpion range.

GSG Moto Crash Protectors

GSG Moto manufacture a huge range of high quality chunky crash pads to help protect your bike in the event of a crash or accidental drop. These are the original and best crash protectors in our experience. They come as a complete kit with all the necessary fittings and instructions.

The crash protectors are designed for maximum contact area and feature a large radius to assist sliding. Where required, kits come with CNC machined aluminium mounting brackets, so they're good looking as well as functional. Spare parts are available, please call for details. Visit www.gsg-mototechnik.de for more information.

GSG Moto Front and Rear Axle Protectors & Paddock Stand Bobbins

GSG also offer a comprehensive range of front and rear axle bobbins and chunky universal paddock stand bobbins.
For full details visit www.gsg-mototechnik.de

Front Axle sliders from £27.66 ex VAT per pair
Rear Axle sliders from £18.20 ex VAT (single) and £29.76 ex VAT (pair)
Paddock Stand Bobbins with M6 or M8 bolts = £17.86 ex VAT
Paddock Stand Bobbins M10 x 1.25 = £19.96 ex VAT
Paddock Stand Bobbins M12 x 1.25 = £21.36 ex VAT

Valter Moto Racing Parts

Valter Moto are an Italian company, working in partnership with and sponsoring many top GP, Superbike and Supersport teams Their rear set range includes the very affordable TYPE 1 rear sets (non-adjustable), TYPE 1.5 (adjustable), TYPE 2.5 (adjustable, with folding footrests, rubber toe spigots & alloy heelplates where required) & TYPE 3.5 (most detailed machining of the range with folding toe spigots & adjustable spigot position). Valter Moto also offer alloy footrest riser plates (aka 'jack up' plates) for several models. Jack up plates are designed to be used with the standard footrest hangers & allow you to move the footrests between 20-30mm back and 10-20mm up, although on some models the adjustments are more limited due to space.

All rear sets are normally supplied in black, except Type 2.5 which are also available in blue, gold, red, green (Kawasaki only) as a special order ETA 4 weeks.

TYPE 1

TYPE 1.5

TYPE 2.5

(folding footpegs)

The Type 1 & 1.5 rear sets are designed for race use, so there is no provision for a mechanical rear brake light switch or return spring. If you need a rear brake light switch we can supply a Goodridge stainless steel hydraulic banjo-bolt switch for an additional charge (please specify thread size of cylinder when ordering). Type 2.5 and 3.5 rear sets are supplied with a hydraulic brake switch as standard.

NEW TYPE 3.5

TYPE 3.5

Footrest Jack Up Plates

Valter Moto Jack up plates allow you to move the stock footrest hangers between 20-30mm back and 10-20mm up, although on some models the adjustments are more limited due to space.

HM Quickshifters

Up until now, only big budget Moto GP teams have been able to realise the significant advantages of strain gauge quickshifters. However, recent advances in manufacturing technologies together with proven designs have allowed HM to produce these quickshifters at a price that WSB, BSB, MRO, club racers and road riders can afford.

Advantages of a Stain Gauge Quickshifter:

- NO MOVING PARTS, so they are ultra consistent and reliable
- DOES NOT rely on movement of the gear lever, so every gear change occurs exactly at the right time
- No missed gears
- The kindest way to treat a gearbox
- Ultra smooth, slick shifts every time
- No mechanical setup at all
- Fully adjustable to suit both you and your bike
- Built in LCD for simple adjustment BOLT ON, PLUG IN and USE
- No cutting or splicing of wires

HM Quickshifters are easy to fit. There is no need to cut, or splice any wires. It's a simple matter of unplugging the existing connectors, plug into supplied loom, refit, connect to earth and it's done. With the HMQuickshifter LCD it is possible to adjust settings for either road, or race shift. You can also adjust the sensitivity for cut and duration of cut.

HM Quickshifter Superlite

£199.99 ex VAT or £249.99 for BMW S1000RR

This little unit packs a punch, there are no control units to set up or wonder where to place on your bike, all you need is this little linkage to experience the thrill of HM Quickshifter. This might be at the bottom of the range, but nothing has been compromised with regards to quality. This awesome quickshifter still far and away outperforms any other non HM quickshifter. It's a HM Quickshifter through and through.

HM Quickshifter 'PC'

£255.31 ex VAT.

For direct connection to a Dynojet Power Commander USB or PCV, Rapid Bike, Kit ECU's, HRC loom. *single injector models only*.

Can also be used with the 'HM IGNITION CONTROLLER' below on early GSXR750/ Hayabusa & R6 models without having to have a power commander fitted.

NOTE: If the bike has twin injectors you will need to use the HMQuickshifter Plus - unless you are using the Dynojet Power Commander with a Dynojet Ignition Module fitted.

HM Quickshifter 'PC & IGNITION'

£357.43 ex VAT inc loom.

As above but with extra module for early Suzuki motorcycles WITHOUT Plug top coils and R6s with CDI's instead of ECU's. Kit includes HM Quickshifter PC and Ignition Controller.

HM Quickshifter 'PLUS'

(for standalone use without a Power Commander) works via the coil sticks so also suitable for twin injector bikes. £340.42 ex VAT inc bike specific loom (or £382.98 for BMW S1000RR's)

To suit Honda, Kawasaki, Suzuki and Yamaha models with plug top coils) also available to fit Ducati, KTM and Triumph models with plug top coils and conventional shift rod linkages. Built-in Intelligent Ignition Controller directly controls ignition cut for all motorcycles with plug top coils. With the HM Quickshifter LCD it is possible to adjust settings for either road or race shift. You can also adjust the sensitivity for cut and duration of cut. Spare loom to fit your existing PLUS onto another model - £50.00 (£100 for BMW loom)

HM Quickshifter 'PLUS SS'

(As above + seamless shifting) £366.66 ex VAT inc loom (£416.66 for BMW S1000RR)

A short while ago, HM Quickshifter released the revolutionary seamless shift technology in their professional level GP Quickshifter. Now that same technological advantage has been made available with the new generation PLUS shifter, the HM Quickshifter PLUS SS (Seamless Shift). Every gear change is different. The seamless shift technology dynamically adapts 'kill time' and other parameters in real time to provide the perfect shift – regardless of RPM, load, rider style or gear. The net effect? Reduced laps times because of the 'time for free' saved on every shift.

Spare loom to fit your existing PLUS SS onto another model - £50.00 (£100 for BMW loom)

HM Quickshifter 'GP'

(incorporating seamless shifting) - From £650

HM Seamless Shift using Gear Dog Engagement Detection (HMSS). The HM GP Shifter has programmable kill times for each gear going up and separately going down the gearbox. However on top of this they have the new revolutionary HMSS system. This system uses intensive and very advanced mathematics and digital signal processing (DSP) to identify when the actual dogs / gears have fully engaged. This nullifies the requirement for kill times and not only ensures the shorted possible kill times it also ensures the smoothest and safest gear change. Regardless of the conditions / load / RPM / gearbox characteristics, it detects when the next gear is actually engaged and then reapplies power. This is a massive step forwards in shifting technology and has made all other shifting products obsolete.

There are also safety programmable minimum and maximum kill times which over ride this algorithm in the rare case that the rider/bike is doing something very unusual and for some reason the shifter does not correctly detect this gear engagement in a timely fashion. Typically a kill time is a crude parameter that must be significantly longer than the actual gear change time due to the vast range of different gear changing conditions. This directly translates to slower lap times, less smooth gear changes, more wear on the gearbox and the potential for a missed gear if the rider/bike does something unusual and ends up taking longer to mechanically shift than the allowed kill time. This is not just a gimmick – this is the culmination of thousands of hours of work by specialists in their field.

HM Quickshifter – World class, sector leading technology, design, development and delivery – FOR THE EDGE

Specification/Features	Superlite	PC	PLUS	PLUS SS	GP
Sensitivity Adjustment	3 settings	FULL	FULL	FULL	Full for each gear and rider/shift style adjustment

Barnett Racing Clutches

Since Charlie Barnett started out with a small storefront in Huntington Park, California in 1948, Barnett has been producing clutches with direct-fit & upgrade applications for just about everything on two wheels. From vintage bikes to the newest machines on the showroom floor, street to off-road and even ATV's. Everything's made in the USA with top-quality materials and designs.

Barnett was the first motorcycle clutch manufacturer to use Kevlar friction material and in 1993 Barnett introduced CNC machined aluminium friction plate cores that feature wider drive tabs to reduce wear on clutch baskets. Newer innovations include "CF" series Carbon Fibre friction plate material and Scorpion billet clutch assemblies for Harley Davidson. Barnett also manufacture a range of billet clutch baskets, pressure plates and coil spring conversions for bikes with diaphragm springs fitted as standard. Here are just a few examples from the replacement Hi-Performance range, please feel free to call us if your bike is not listed below or visit: www.barnettclutches.com for the very latest applications.

BIKE ENGINED CARS: We have a range of heavier springs for some BEC applications, please specify vehicle when ordering.

At PDQ we keep good stocks of all their performance clutch kits for bike or kit car use.

We have listed a selection of popular applications, but please call us if your model is not listed, as the range is extensive.

Make & Model	Frictions	Steels	Set of Springs
Aprilia RS250 (all)	303-10-10001 - Complete Kit = £132.31

PLEASE CALL IF YOUR MODEL IS NOT LISTED, THIS IS A SMALL SELECTION OF THE MOST POPULAR ITEMS IN THE BARNETT RANGE.

Barnett Coil Spring Conversion Kits

These kits convert the clutch from a standard diaphragm spring to six coil springs, providing a more positive, controllable engagement. The pressure plates are CNC machined from billet aluminium & anodised.

Please note: These kits consist of pressure plate, springs & bearing (if required) only, clutch plates must be purchased separately if required. All coil spring conversions are 'bolt on', no other modifications are required.

Yamaha Models

Model	Part Number	Notes	Optional heavier duty spring set
YZFR1 98-03	511-90-10003 = £143.00	Consists of a billet pressure plate, two sets of heavy duty springs, bolts & cups	N/A
XVS1100 V-Star 99-09 & XV1100 86-98	511-90-10006 = £167.15	Consists of a billet pressure plate, heavy duty springs & spring retainer plate	501-64-06088 = £17.57
All XJR1200/1300 & FJ1100/1200	511-90-10001 = £143.09	Consists of a billet pressure plate, heavy duty springs, bolts & washers	501-82-06023 = £17.57
XTZ1200 SUPER TENERE 10-16	511-90-10009 = £172.18	Consists of a billet pressure plate, 2 sets of heavy duty springs, bolts & washers	Included in kit
FJR1300 03-15	511-90-10033 = £143.00	Consists of a billet pressure plate, heavy duty springs, bolts & washers	N/A
V-Max 1200 (up to '07) models, Road Star, XVZ1300	511-90-10002 = £143.00	Consists of a billet pressure plate, heavy duty springs, bolts & washers	501-82-06023 = £17.57
MT-01 06-10	511-90-10008 = £172.18	Consists of a billet pressure plate, heavy duty springs, bolts & washers	Included in kit
XV19 Raider 08-12 Roadliner/Stratoliner 06-12	511-90-10007 = £172.18	Consists of a billet pressure plate, two sets of heavy duty springs, bolts & cups	N/A

Clutch Pressure Plate (Ducati Dry Clutch models)

This great looking durable pressure plate is CNC precision machined from billet aluminium and available anodised red, black or gold. The attractive reinforced design also helps protect the clutch in the event of a low side or tip over. The bearing and clutch control pin are also included for an easy, trouble free installation. Suitable for all 6-speed dry clutch models.

Anodised Gold = 361-25-01012 = £181.70
Anodised Red = 361-25-01812 = £181.70
Anodised Black = 361-25-01512 = £181.70

Also available for a selection of off-road models (CRF, TRX, KX, KLZ, RM, LTR, YZ, WR, YFZ, YFM models etc.)

Ducati Billet Alloy Clutch Baskets

The Barnett billet aluminium clutch basket for Ducati 6-Speed dry clutch models is CNC machined from tough 2024-T3 billet aluminium and utilises patented stainless steel inserts to prevent severe grooving from the clutch plate tabs and provide smooth, consistant performance. Available in red, black or gold.

Anodised Gold = 321-25-01012 = £198.32
Anodised Red = 321-25-01812 = £198.32
Anodised Black = 321-25-01512 = £198.32

Barnett Billet Clutch baskets are also available for a selection of off-road models (CRF, TRX, KX, KFX, KLZ, RM, LTR, LTZ, KTM, Polaris, YZ, WR, YFZ, YFM models etc.

Dynojet & K&N Filters - The winning combination

Stage 1 - Dynojet Kits and K&N Filters

To suit standard bikes, with STANDARD AIRBOX, engine and exhaust. Adjustable to suit K&N AIRBOX FILTER, RACE END CAN or FULL SYSTEM. Stage 1 kits provide increased power and improved throttle response over the whole rev range.

Stage 2 - Dynojet Kits and K&N Filters

To suit standard bikes, with a MODIFIED AIRBOX, K&N FILTER and aftermarket EXHAUST. Stage 2 kits are designed to give greater improvements to performance, together with good throttle response and driveability. Not every bike has a Stage 2 set up listed as often the standard airbox is efficient enough.

Stage 3 - Dynojet Kits and K&N Filters

Designed to suit standard and lightly tuned engines, using INDIVIDUAL K&N CLAMP ON FILTERS and an aftermarket RACE CAN or FULL SYSTEM. Please note: On some engines the Stage 3 may compromise driveability, especially low down the rev range on short stroke, high revving motors. Not every bike has a Stage 3 set up listed as often the standard airbox is efficient enough.

Dynojet Power Commanders (PCIII USBs and the latest PCV's)

Each Power Commander unit is supplied with a model specific map, designed to improve performance over stock. In addition, several maps for alternate tuning packages are included on the CD and can be downloaded into the Power Commander via Laptop or PC.

The Power Commander kits include a PC link cable and software package, which allows you to fully map the fuel curve via a computer. If no computer is available, the fuel curve can be adjusted using three touch buttons on the faceplate (PCIII USB models only). PCIII USBs are available for most bikes manufactured before 2009, for the later 2009 and onwards models there is the new PCV.

The Power Commander V is the latest in engine control technology from Dynojet. The PCV is very compact, yet offers expanded features and options, with tremendous control over your engine management system. Using stock connectors means it is easy to put the bike back to it's standard OEM fuel map (unlike modern ECU 'flashing')

Dynojet PCV Features

- Smaller unit - less than ½ the size of the PCIII USB
- Unit powers up via the USB - no need for 9v battery and adapter
- 2 position map switching as standard - switch not included
- Gear and speed input as standard
- 5v analogue input as standard - boost, temperature, MAP etc
- Enhanced Accelerator pump feature - vastly increased adjustment
- Optional control unit to allow 8 injector mapping
- Operates with Dynojet LCD display and Dynojet quickshifter
- New and improved software suite
- Enhanced Quickshifter control - Adjustable kill time per gear and time between shifts.
- Twin CAN ports for integration and expansion
- OBD On board fault diagnosis
- IMPROVED MAPPING FEATURES: PCV allows -100% to +250% fuel adjustment, User definable map break points, upto 96 x 96 break points (10 Throttle position break points as standard, up from 9 for the PCIII USB), Individual mapping/maps per gear, Individual mapping/maps per cylinder, Individual mapping/maps against 5v input, for example a mapping per cylinder, per gear could result in 24 individual fuel maps.

K&N Air Filters

For over 40 years K&N have manufactured serious air filters far superior to traditional disposable filters.

K&N air filters are designed to achieve high, virtually unrestricted air flow while maintaining filtration levels critical to ensure long engine life. The secret to their success lies in the unique characteristics of the filter medium that was originally developed by K&N for desert motocross racing in 1969. The K&N high flow cotton gauze air filter is washable, reusable and built to last for the life of an engine. K&N air filters consist of four to six sheets of cotton gauze layered between two sheets of aluminium wire mesh. This media is then pleated and oiled to enhance its filtering capabilities and overall performance. The result is an air filter that allows dramatically more air into an engine, is washable and reusable, and will protect your engine for the life of your vehicle.

Air Filters for Off-Road Dirt Bikes and ATV's - K&N Replacement Air Filters are ideal for extended use in dirty and dusty off-road riding and provide clean carburation even at high altitude. As a rule, no jet changes are required with just a K&N filter element, however the spark plug condition should be checked for proper mixture after the first few miles of riding. If the airbox has been modified (or removed) for increased air flow, the fuelling will almost certainly have to be adjusted to prevent lean running.

The Last Air Filter Your Engine Will Ever Need - K&N warranty their replacement element filters for 10 years or 1 million miles. K&N use only the highest quality materials and never compromise. Every 10,000 - 15,000 miles, we recommend you clean and re-oil your K&N filter, then put it back in your airbox and it will perform virtually like new. Obviously in particularly dirty/dusty conditions you may need to clean your filter more often.

K&N Oil Filters - K&N's oil filters feature state of the art filtration paper designed for maximum flow, yet dirt efficient to meet or exceed OEM specifications. These filters are TUV-endorsed and TUV-factory production monitored. K&N Oil filters are compatible with all the latest synthetic engine oils. The spin-on filters feature a heavy duty metal can with a 17mm nut on the end. This nut allows easy installation and removal, and is also pre-drilled for lockwiring.

Visit www.knfilters.com for further information.

Dynojet Power Commanders & Accessories for FUEL INJECTED models

Dynojet Research have developed a wide range of 'Power Commander' fuel injection adjustment modules, each comes pre-loaded with a model specific map, designed to improve performance over stock, in addition, several maps for alternate tuning packages are available on the CD supplied, or to download free from the powercommander.com website. Tuning centres (such as PDQ) can custom map your Power Commander to suit your exact specification, for the best in performance and economy.

Ignition Modules (for PCIII and PCV)

The Dynojet Ignition Module is an optional "add on" accessory for select Power Commanders. It allows you to control and adjust the ignition timing. As in the case of the Power Commander, the Dynojet Ignition Module uses OEM style connectors to plug in-line of the stock ignition harness so no cutting or splicing is required. The module uses "direct coil driver technology" and allows a high degree of timing adjustment. In the Power Commander Control Center Software the user is able to advance or retard the ignition curve up to 10 degrees based on throttle position and RPM. It is also possible to alter the timing for each cylinder individually if necessary. On motorcycles that have eight injectors and were not previously able to benefit from the use of the Dynojet Quick Shifter, the Ignition Module now allows this functionality.
(Quick shifter sensor must be purchased separately, see below)

Quick Shifter Sensors (for PCIII and PCV)

Dynojet Quick Shifter Sensors are compatible with Power Commanders (or the standalone Quickshifter unit) and allow full throttle, clutch-less upshifts. These high quality sensors provide fast, accurate and reliable shifting. Sensors are attached to the gear linkage and connect into the Power Commander expansion port. Kill time and minimum RPM shift point are adjustable within the Control Center Software. There are 2 styles of sensor, the 'Linear' Sensors & 'Inline'

We have a range of universal rods for inline shifters that are specifically designed to give maximum adjustment, using M6 & M8 right hand and left hand male and female threads over a wide range of 90mm to 280mm lengths.

Quickshifter Adaptor Rods

QEM Quickshifter Expansion Modules (for twin injector models with a PCV)

The QEM allows a Dynojet Quick Shifter sensor to be used with the Power Commander V on bikes that have two sets of injectors. The QEM connects to the upper injectors and then into the PCV. Once the sensor is attached you will have full Quick Shifter functionality at the lowest cost possible. Must be used with one of the Dynojet shifter sensors above (sold separately).

NOTE: A QEM is not necessary if using an SFM

SFM Secondary Fuel Module (for twin injector bikes with a PCV fitted)

The 'SFM' connects to the upper injector rail on twin injector bikes. Fuel adjustment to the upper injectors can then be made through the Power Commander V to both the upper and lower injectors by as much as +250/-100%. It also allows adjustment of the upper injectors separate from the lower injectors. The SFM also has quick shifter functionality to enable the quick shifter sensor option.

If you wish to use the Quick Shifter function on the SFM with your PCV you will need one of the Dynojet shifter sensors above (sold separately).

The Dynojet Ignition Module is an optional "add on" accessory for select Power Commanders. It allows you to control and adjust the ignition timing. As in the case of the Power Commander, the Dynojet Ignition Module uses OEM style connectors to plug in-line of the stock ignition harness so no cutting or splicing is required. The module uses "direct coil driver technology" and allows a high degree of timing adjustment. In the Power Commander Control Center Software the user is able to advance or retard the ignition curve up to 10 degrees based on throttle position and RPM. It is also possible to alter the timing for each cylinder individually if necessary.

On motorcycles that have eight injectors and were not previously able to benefit from the use of the Dynojet Quick Shifter, the Ignition Module now allows this functionality (Quickshifter sensor must be purchased separately).

PLEASE NOTE: A DYNO SET UP IS REQUIRED ON ALL IGNITION MODULES

PDQ offer a professional fitting and custom mapping service on all Dynojet Power Commander Products - please call for details.

Power Commander Fuel Controller (PCFC)

The Power Commander FC is a new plug-n-play fuel management device pre-programmed with Make/Model specific maps. In addition the Power Commander FC has the added ability to modify or change these maps on the fly without a computer.

Users can literally select between a Power Commander FC Map, custom-built maps, or even fine tune low, mid or high rpm ranges while sitting on the bike and without plugging into a computer. Standard +/- 10% increments from selected map settings, different ranges are available using the supplied Control Center software.

Users can also load up to 10 of their personally built Power Maps into the Power Commander FC and select between them while in the saddle - eliminating the need to "re-boot" with the computer every time a new map is desired.

Please Note:
This unit does NOT work with any of the Dynojet accessories - SFM, Ignition Module, shifter, LCD.

PCFC Features

- Uses OEM style connectors and high quality wiring harnesses
- Small, lightweight and easy-to-fit on the bike
- Pre-programmed with PCFC Power Maps specific to make, model
- No computer necessary for modifying fuel management
- Fully adjustable computer compatibility for ultimate tuning and personalization
- Software is compatible with Power Commander, so you can download Power Commander maps to the PCFC
- Integrated O2 Optimizer where Applicable
- +250 / -100 fuel change. Enough adjustment to cover almost all modifications
- Enhanced "accel pump" utility (increased adjustment and sensitivity ranges). When you need to adjust your fuel curve for quick throttle inputs.

DYNOJET & K&N Fuel Injection Tuning

Dynojet Oxygen Sensor Controllers and Eliminators

Some fuel injected models have oxygen sensors fitted into their exhausts as standard, the stock ECU reads from these sensors and as a result, adjusts the fuelling. The sensor(s) on many of these models must be removed/modified for the Power Commander to function properly over the whole rev range. Oxygen sensors can be disconnected from the loom but this will usually cause the FI warning light to trip. Fitting a Dynojet O2 sensor eliminator/controller into the bike's wiring loom will prevent this happening & often allow adjustments in the closed loop area of the map. Check the Power Commander application list to see if your model requires an eliminator, optimiser or a controller (in some cases they are included with the Power Commander).

Oxygen Sensor Controllers / Optimisers. (aka O2 controllers)

K&N Race Specific Air Filters

A K&N race specific air filter has just two layers of cotton to provide even lower air restriction than the standard high flow K&N replacement air filters. Unlike the regular K&N replacement air filters, fuel injection adjustments may well be necessary with a racing filter. K&N racing air filters are washable and reusable and come with a one year limited warranty.

K&N Performance Oil Filters

K&N oil filters feature state of the art filtration paper designed for maximum flow, yet dirt efficient to meet or exceed OEM specifications. These filters are TUV-endorsed and TUV-factory production monitored. K&N Oil filters are compatible with all the latest synthetic engine oils.

The spin-on filters feature a heavy duty metal can with a 17mm nut on the end. This nut allows easy installation and removal, and is also pre-drilled for lockwiring.

Some naked and custom model oil filters are available in chrome as well as black (shown by a 'C' on the end of the part number in the price list below).

K&N offer a wide range of off-road and ATV filters as well as specialist universal clamp on filters of various shapes and sizes, filter wraps and accessories.

Please call us if you wish to receive a free K&N Powersports catalogue (which includes clamp on filters by dimension) or visit www.knfilters.com for further information.

K&N Fuel Filters and Accessories

K&N Fuel Filter

5/32" flanges
1-3/16" body diameter
2-3/16" overall length
(1-1/4" filter body length).
Nylon mesh filter element.
Single: 81-0291 = £8.79
12-Pack: 81-0290 = £78.83

K&N Fuel Filter

1/4" flanges
5/8" body diameter
2-1/8" overall length
(1-5/16" filter body length).
Sintered brass filter element.
Single: 81-0221 = £10.69
12-Pack: 81-0220 = £69.29

K&N Stainless Mesh Fuel Filter

1/4" flanges
1-5/16" body diameter
1-3/4" overall length
(3/4" filter body length).
Stainless steel mesh filter element.
Single: 81-0231 = £9.39
12-Pack: 81-0230 = £62.39

K&N Stainless Mesh Fuel Filter

5/16" flanges
1-1/2" body diameter
1-3/4" overall length
(3/4" filter body length).
Stainless steel mesh filter element.
Single: 81-0241 = £12.59
12-Pack: 81-0240 = £77.09

Plastic "T" Fuel Line Fitting

High flow, durable, lightweight, easy to use.
One size fits 1/4" to 3/8" I.D. hose.

Single: 81-0271 = £5.79
12-Pack: 81-0270 = £33.29

Filter Adapters for Keihin FCR 41mm Carbs

Lightweight nylon constuction.
Fits 41mm Keihin CR flat slide carbs
53mm long. Uses any K&N 62mm inlet filter

Single adapter: 85-3000 = £29.27

Dyna 2000 Digital Performance Ignitions

The Dyna 2000 ignition system for four cylinder engines represents a breakthrough in motorcycle ignition flexibility. The system consists of a state-of-the-art microprocessor controlled ignition module along with an adjustable Dyna dual sensor crank trigger. For the first time you can actually set the ignition timing to what you want to maximise engine performance. A number of different advance curve modes and a broad range rev limiter let you tailor the ignition to your needs.

Dynatek has also added the ability to custom program the Dyna 2000 Sportbike ignition via a personal computer. The Dyna 2000 can be programmed with a custom advance curve, retard mode curve and RPM limit using the optional accessory curve maker kit. There are also 2 user programmable RPM outputs that can be used to activate a shift light or other RPM activated device.

The following features come as standard:

FULLY STATIC TIMABLE
Set the timing accurately without having the engine running.

INDEPENDENT 1&4, 2&3 CYLINDER TIMING
Allowing you to accurately set the timing for each cylinder pair.

FIVE DIFFERENT ADVANCE CURVES
You can advance slowly to dial out pinking on high compression motors or bring in the advance quickly on quick revving motors, or select a curve between to maximise the performance of your combination.

FOUR DIFFERENT RETARD MODES
The Dyna 2000 is an ideal solution for turbo and nitrous applications.

BROAD RANGE REV LIMITER
The Dyna 2000 rev limiter is adjustable from 8,500 to 16,000.

SAFETY INTERLOCK INPUT
You can keep you side stand safety switch functional or hook up a theft prevention switch, or activate a shift lever kill for road racing.

DIGITAL TACHOMETER OUTPUT
Your tachometer will run smooth and accurate, even at the rev limit.

COMPLETE WIRING HARNESS
The Dyna 2000 kit includes a complete wiring harness to simplify installation.

LOW COST
In most cases, the Dyna 2000 system costs less than a stock ignition box.

Dyna 2000 modules are available for various four stroke models including:

Honda: 1969-78 500/550/750 4-cyl, CB750/900/1100 (79-83), CBR600 87-97, CBR600RR 03-06, CB600 HORNET 98-06, CBR900 93-99, CBR1100XX 97-07.

Kawasaki: GPZ550 81, KZ900/1000/1100, GPZ, KZ650, ZX10 88-90, ZX6R 98-01, ZX7R, ZX9R 93-97, ZZR1100, ZX14R 06-10.

Suzuki: GS550/750/850/1000/1100/1150, Katana, Bandit 1200, GSXRs 86-97, RF600/900, 03-09 GSX1300R Hayabusa 1300.

Yamaha: FJ1100/1200, R1 '07-08.

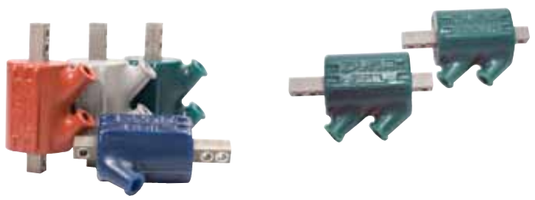
Typical 4 Cylinder price from £300.66 ex VAT (does not include coils)

Dyna Coils

These high performance coils from DYNA are designed to replace most stock motorcycle coils and give you a big increase in spark voltage. The coils accept all conventional spark plug wires, or the high performance Taylor ones below. They fit most stock brackets and hardware for direct bolt on use. The angled output towers provide more clearance in cramped spaces.

Available in 3.0 Ohm, 2.2 Ohm or 1.5 Ohm, Single or Twin output
(check your manual for the correct spec)

Pair of Dyna Coils = £119.53 ex VAT
Mini coils are also now available from £133.87 ex VAT per pair.



Taylor Leads - The Ultimate

Renowned the world over as the best H.T. leads money can buy, Taylor leads are the ultimate leads to fit to your bike. Available with several different styles of plug cap (long boot, short boot and angled short), Taylor leads are perfect partners for DYNA coils and other performance ignition modifications.

Available in: BLACK, PINK, ORANGE, RED, BLUE, GREEN, YELLOW and PURPLE.

Long Boot (GSX-R type) = £12.95 each
Short Boot = £12.95 each
90 degree boot = £12.95 each
135 degree boot = £12.95 each

Price is PER LEAD ex. VAT

PLEASE NOTE:
We can make up these leads to order, so if you have special requirements (i.e. extra long leads for one-off applications), please call.

Nitron Shocks

Nitron shock absorbers combine outstanding performance with exquisite design at an affordable price. Each unit is custom built in the UK, valved and sprung to precisely suit each individual rider. The shocks are assembled taking into account rider weight, type of riding (street, touring, track day or racing) and any other custom requirements such as a specific length.

Nitron shocks are a gas monotube shim type with a high pressure gas charge. Couple this with a large piston area and an all alloy construction and you get an ultra low friction shock with excellent heat dissipation properties, ensuring total reliability and fade resistance.

Nitron benefits include:

- Easy Adjustment
- Very light weight, CNC machined and hand built
- Corrosion Resistant - Titanium anodised & electroless nickel plated
- Fully rebuildable and revalveable
- Infinite range of bump / rebound ratios
- Very low friction design
- Separate nitrogen charge with fully floating piston
- Sealed adjusters.

NITRON R1 SPORT SHOCK

The NTR SPORT shock is intended principally as a road shock. It uses a single combined damping adjuster to control both rebound and compression. This simple system makes it very easy for a road rider to get the right set up for their own personal use. It also has spring preload adjustment and in most cases length adjustment. Every sport shock is custom built, sprung and fully serviceable - a true performance upgrade.

£385.00 ex VAT

- Custom built
- 40mm piston
- 1 way adjustment
- 14mm rod
- HPA option available (+£185)

NITRON R2 TRACK SHOCK

The NTR TRACK shock is a sophisticated unit intended for fast road and/or track use. Totally dependable, fade resistant and hand built with low friction components the NTR TRACK shock is made to last. A piggy back, pistol grip or remote reservoir allows tool-free quick and simple independent control of compression and rebound damping. As always spring preload adjustment is included and most units have adjustable length. The remote hydraulic preload adjuster is available as an optional extra on most models.

FROM £535.00 ex VAT

- Custom built
- 40mm piston
- 2 way adjuster
- 14mm rod
- HPA option available (+£185)

NITRON R3 RACE SHOCK

The race winning NTR RACE shock's performance is achieved through precise control of it's 3-way damping. Made for the most demanding riders, instant feedback is transmitted from the rear wheel and allows the limits of traction to be fully explored. The range of adjustments, special features and superb value are combined in a modern design that compliments any motorcycle. As always spring preload adjustment is included and most units have adjustable length. The remote hydraulic preload adjuster is available as an optional extra on most models where space allows.

FROM £610.00 ex VAT

- Custom built
- 40mm piston
- 3 way adjustment
- 14mm rod
- HPA option available (+£185.00)

NITRON **RACE PRO** SHOCK

The NTR RACE PRO shock features unique large piston technology to create the fastest reacting, most refined shock available. Through the use of a class leading 46mm piston and ultra strong 16mm piston rod the Race Pro shocks demonstrate exceptional levels of damping control with rebound plus high and low speed compression damping adjustment as standard. The fade resisting properties of the large piston, Nitron's unique valving and quality components combine to make the Race Pro a TT & Superbike winner. The Race Pro features a length adjuster as standard (subject to model/clearance)

FROM £815.00 ex VAT

- Custom built
- 46mm piston
- 3 way adjustment
- 16mm rod
- Data mounts if req
- HPA option available (+£205)

Piggy back version shown here with optional remote hydraulic preload adjuster fitted (add £205)

NITRON ADVENTURE SHOCKS

Specifically designed and built for Dual Sport and Adventure bikes, the Adventure Series shocks offer exceptional year-round road and trail performance. Using billet aluminium components, Adventure shocks vastly improve the ride/handling of the bike at a significantly reduced weight compared to a standard shock. Rear adventure shocks feature heavy-duty 16mm rods and a high-flow 46mm piston, both of which are custom tuned and developed for the demands of long-haul touring through to Paris-Dakar style endurance events. Titanium and hard-anodised parts are hand built to last not only the lengthiest endurance races but also the harshest of winters.

ADV R1
(BMW Front)

40mm piston

1 way adjust

14mm rod

16mm rod

Optional HPA remote hydraulic preload adjuster (+£205.00)

From £645.00

HYDRAULIC PRELOAD ADJUSTER OPTIONAL EXTRA FOR MONOSHOCKS from £185.00 ex VAT

The hydraulic preload adjuster allows you to quickly and easily change the preload on the spring via a remote knob without the need for tools. This is particularly useful for people who regularly take pillion passengers and/or luggage as it allows compensation for a variation in load. Maintaining the correct ride height will help retain the normal comfort and handling characteristics of the motorcycle. This option is available on all specs of shock, from R1 to RACE PRO as long as there is enough clearance. Add £185.00 (for R1, R2 and R3 shocks) or £205.00 (for RACE PRO)

- Shocks are also available with black springs, please let us know at time of ordering
- All shocks are made to order and can take a couple of weeks to be manufactured from date of ordering.

NITRON TWIN SHOCKS

NTR Twin R1. Reliable performance gas mono-tube for twin-shock bikes to be enjoyed on the road. NTR R1 Twin shocks are the best entry-level gas mono-tube damper you can get for your twin-shock bike, the NTR Twin R1 shocks provides superb control with a broad adjustment range to suit any rider. These shocks feature all the benefits of the other NTR shocks plus simple adjustment and easy spring preload settings. Fully serviceable and rebuildable with special designs available upon request. From £550.00 per pair.

Also available for certain models:

CLASSIC R1 TWIN (with black springs and gunmetal bodies)

STEALTH R1 TWIN (with black springs and black bodies)

R1 TWIN

CLASSIC R1 TWIN

STEALTH R1 TWIN

NTR Twin R3. Three damping adjustments make the NTR Twin R3 shocks the obvious choice for those who want to get the most out of their twin-shock bike. High and low speed compression control enables fine tuning of the chassis, whilst the fully-machined piggyback reservoir system gives unrivalled rear grip. Super smooth hard-anodised finishes with no metal-to-metal internal contact equate to an inimitable reduction in friction and increased damping response.

Optional 20mm longer end-eyes are available for the twin-shock series.

Also available for certain models:

CLASSIC R3 TWIN
(with black springs and gunmetal bodies)

STEALTH R3 TWIN
(with black springs and black bodies)

Fully adjustable R3 Shocks from £1,100.00 per pair.

Please see page 82 for detailed descriptions of Nitron shock features and adjustments

Key To Nitron Shock Specs & Features
eg: M-14/40-PB-GS-D3-I-HP1

M = Monotube
E = Emulsion Type
GS = Gas Separator piston in main body of shock

14, 16 = Piston rod diameter in mm
35, 40, 46 = Piston diameter in mm

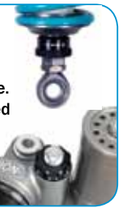
PBA
Pistol grip type with gas reservoir piggybacked to main body of the shock

PB
Piggyback type with gas reservoir piggybacked to main body of the shock

PBB
Inline type with gas reservoir piggybacked to the main body of the shock

H
Remote gas reservoir attached to the main body of the shock via a flexible hose

D3
Rebound damping adjustment wheel on end eye. Independant hi and low speed compression adjustment on reservoir.



D1
Combined rebound and compression adjustment. Adjuster wheel on end eye.

D2
Rebound damping adjustment wheel on end eye. Independant compression adjustment on reservoir.

L
Adjustable shock length for ride height alterations

HP1
Hose mounted hydraulic spring preload adjuster

HP2
Integrated hydraulic spring preload adjuster

Optional Extras and Spares

HYDRAULIC PRELOAD ADJUSTER - OPTIONAL EXTRA FOR MONOSHOCKS from £185.00 ex VAT

The hydraulic preload adjuster allows you to quickly and easily change the preload on the spring via a remote knob without the need for tools. This is particularly useful for people who take pillion passengers and/or luggage as it allows compensation for a variation in load. Maintaining the correct ride height will help retain the normal comfort and handling characteristics of the motorcycle.

The HPA option is available on all specs of shock, from R1 to RACE PRO as long as there is enough clearance.

Add £185.00 (for R1, R2 and R3 shocks) or £205.00 (for RACE PRO)

Spare NTR Spring (Black/Gunmetal or Turquiose) from £62.50

Öhlins Suspension - The Original Gold

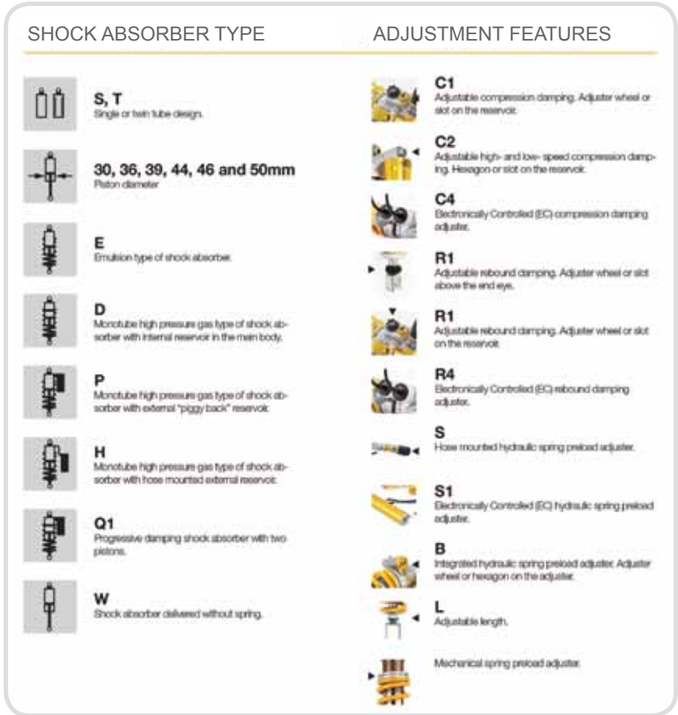
Since starting out in 1976, the focus for Öhlins Racing AB has been designing and manufacturing shock absorbers that go beyond the 'run-of-the-mill' aftermarket shock absorbers, and that surpass the very highest of standards. Every Öhlins shock absorber is a technically advanced product with respect to performance, precision, quality, endurance, safety and reliability. This is one of the key factors that lie behind all of the successes that Öhlins shock absorbers are constantly achieving on the race tracks today, they are in a class of their own.

Strong co-operations with elite racing teams in the MotoGP and WSB paddock give Öhlins tremendous opportunities to test new technology that sooner or later will end up in Öhlins 'off the shelf' products. It is therefore no coincidence that more and more "ordinary" motorcyclists – who think only the best is good enough – are discovering that Öhlins shock absorbers keep the same high standard for their motorcycles as they do for the world's elite.

There can be several Öhlins price revisions throughout the year. Please contact us for the very latest up to date price and availability info.

To see the full range of Öhlins products currently available for your motorcycle please visit www.ohlins.com

PDQ are an Authorised Öhlins Service Centre, as well as suppying Öhlins products, we can offer repairs, servicing & bespoke set ups.



SHOCK ABSORBER TYPE

S, T Single or twin tube design.

30, 36, 39, 44, 46 and 50mm Piston diameter

E Emulsion type of shock absorber.

D Monotube high pressure gas type of shock absorber with internal reservoir in the main body.

P Monotube high pressure gas type of shock absorber with external "piggy back" reservoir.

H Monotube high pressure gas type of shock absorber with hose mounted external reservoir.

Q1 Progressive damping shock absorber with two pistons.

W Shock absorber delivered without spring.

ADJUSTMENT FEATURES

C1 Adjustable compression damping. Adjuster wheel or slot on the reservoir.

C2 Adjustable high- and low- speed compression damping. Hexagon or slot on the reservoir.

C4 Electronically Controlled (EC) compression damping adjuster.

R1 Adjustable rebound damping. Adjuster wheel or slot above the end eye.

R1 Adjustable rebound damping. Adjuster wheel or slot on the reservoir.

R4 Electronically Controlled (EC) rebound damping adjuster.

S Hose mounted hydraulic spring preload adjuster.

S1 Electronically Controlled (EC) hydraulic spring preload adjuster.

B Integrated hydraulic spring preload adjuster. Adjuster wheel or hexagon on the adjuster.

L Adjustable length.

Mechanical spring preload adjuster.

TTX Shock Technology Explained

Cavitation – it's a nightmare! Pressure drops in the shock absorber results in gas bubbles forming in the oil, resulting in a catastrophic loss of damping force. First, this problem was reduced through the use of pressurized gas acting upon the oil. But the engineers at Öhlins weren't satisfied. They designed a revolutionary damping system, where low pressure areas never need to arise. With the TTX technology, the pressure balance is always positive and the risk of cavitation is eliminated.

After an extensive development and testing program, the TTX technology was first introduced in racing and instantly delivered major championship victories. Since then, it was made available for privateers and then adapted for street applications. Now the technology is available in a wide range of products, from the hypersport to the adventure segments. Also, it forms the base for the Öhlins electronically controlled suspension, EC.

The acronym has an actual meaning. The TTX stands for Twin Tube Crossflow, the X illustrating how the oil is flowing through the cylinder head. Thanks to the revolutionizing design, the pressure created by the piston is transferred through the adjusters in the cylinder head and then flows through the space between the tubes back to the cylinder. Thereby, a positive pressure balance can be upheld at all times. There are no shim stacks on the main piston, nor are there any valves acting on the flow to the outer reservoir. It's only duty is to harbor excessive oil, stemming from the piston rod displacement and heat expansion. Inside the reservoir, there is a dividing piston to keep the oil separated from the nitrogen gas. This gas pressurizes the oil to a level between six and nine bars, basically the static pressure acting on both sides of the main solid piston. The same principles are successfully used in Öhlins front forks and racing cartridge kits – race proven, and now available for the street.

TTX GP

Straight from the champions – the new TTX GP is Öhlins latest range of shock absorbers for sport and hypersport bikes. Based on the highly regarded TTX technology it has been developed from Öhlins' vast experience in MotoGP. Compared with the standard TTX36 MkII, the compression and rebound adjustments have improved even further with a new adjustment needle, providing better guidance and a different flow restriction behaviour. The function of the damper is more consistent with less variation and the adjusters work in a more precise manner. A new main piston completes the package, designed to improve traction and rider control. Did we mention that the weight is reduced even further.

Among the advantages are a much improved chassis feedback as well as enhanced performance. Also, the adjustment range is even wider and with this new design, the variation in behavior from one shock absorber to another is further reduced – a proof of Öhlins commitment to precision. The TTX GP continues on the TTX36 path, sharing and improving on the benefits of one of the best shock absorbers in the world.

The TTX GP shock is available for most major bikes used in national racing as well as the new street bike models.

FEATURES

• TTX technology, twin tube technology • No risk of cavitation • Solid piston • Rebound and compression adjustment straight from MotoGP • Adjustment needles with different flow restriction behavior to improve chassis feedback • New main piston • Wider and more precise adjustment range • Adjustment possible by hand or with hexagon tool • Completely separated functions for rebound and compression damping • Easy to change settings, based on Öhlins setting bank.

TTX RT

The TTX Road & Track is developed for the latest hypersport models as a complement to the top of the line TTX GP shock. The TTX RT has a competitive price but still offers great performance for the road and track day enthusiast. The shock is based on the TTX36 with it's race proven technology. It has a traditional C-spanner type pre load adjustment and the advantage of rebound and compression adjustment easily accessible on the cylinder head. The TTX technology has brought bikes and riders to the podium and to the winners circle many times. Now the experience from MotoGP and WSBK can be on your bike too and at a much affordable price. Check valves are improved in terms of opening force and closing forces and each and every part has been under the sharp eye of the Öhlins engineers. The result is a shock absorber with the long term technology developments from Öhlins, all learned from experience in MotoGP and WSBK, now at a competitive price in the shape of the TTX RT. The TTX RT is available for most major hypersport models.

FEATURES:

- TTX-technology – no cavitation risk
- Wide adjuster range
- Completely separated functions for rebound and compression damping
- All adjustments are done on the cylinder head of the shock absorber
- Length adjustable for most models

TTX Adventure

The thoroughly race proven TTX technology makes it into the Dual Sport segment, delivering unparalleled performance. Designed for the BMW R1200GS, the Öhlins TTX36 and TTX39 shock absorbers improves on feedback, control and comfort. With reinforced cylinders, the Dual Sport TTX shock absorbers are prepared for the challenges waiting ahead. Of course, both front and rear shocks benefit from all the common TTX advantages, such as individually adjustable compression and rebound damping and eliminated risk of cavitation. Developed exclusively for the Dual Sport segment, the rear TTX39 shock is designed specifically to cope with the varying and sometimes unforgiving load conditions of on and off road use.

FEATURES:

- TTX36 mm front shock absorber for Dual Sport and Adventure
- TTX39 mm rear shock absorber specifically designed for the adventure and dual sport segment
- Reinforced cylinders
- Individual setting of spring preload front and rear
- Individual settings of both compression and rebound front and rear
- Full maintenance possibilities.

STX 46 (aka S46E/S46D.../S46H.../S46P...)

A well proven monotube design, the Öhlins STX46 shock absorber sets the standard for performance, quality and durability. A major suspension upgrade for your sports bike suspension, it features a large 46mm main piston and an internal gas reservoir within the main body of the shock. With adjustable damping, you can change the behaviour of the shock to suit your taste and even fit a hydraulic spring preloader to change the stance of the bike. Available for various street and adventure models. The S46D/E type is shown on the far right (without additional reservoir), the S46H shocks feature a hose mounted reservoir and the S46Ps have piggy back or pistol grip reservoirs. Hydraulic spring preload adjusters also feature on select models.

S46D/E

FEATURES:

- Monotube shock absorber
- Öhlins well proven design
- Adjustable rebound damping and compression
- A range of spring rates available
- Maintenance possibilities
- Optional hydraulic spring preload adjuster
- Available for more than 100 different bike models.

S46H

S46P

STX36 Shocks (aka S36D/E, S36P, S36K)

Developed for bikes with twin shock absorbers, the Öhlins STX36 is a classic monotube design, featuring all the classical Öhlins qualities delivering top notch performance for your street bike. Available in emulsion, piggyback or hose versions, depending on application, it can also be specified with a number of different damping adjustment options with or without length adjustment. Suitable for any application from cruisers to café racers, the STX36 shocks are one of Öhlins most successful designs of all times.

FEATURES

- Well proven monotube design • Emulsion, dividing piston, piggyback or hose type gas pressurized system • Each application tested and tailor made to suit
- Designed for comfort and rideability on cruisers • Wide range of spring rates are available • Optional black, yellow and chrome springs are available on some models.

STX36 Blackline Shocks

The new Blackline STX36 shock absorbers is developed for bikes with twin shock absorbers. The Öhlins STX36D and STX36P Blackline are a classic monotube design, featuring all the classical Öhlins qualities delivering top notch ride comfort and performance for your bike. Available in dividing piston or piggyback versions, depending on application, it can also be specified with a number of different damping adjustment options with or without length adjustment. They are designed for Harley-Davidson and custom bikes with twin shock absorbers.

FEATURES STX36D

- Well proven monotube design • Dividing piston gas pressurized system • Designed for comfort and rideability
- New black design • Each application tested and tailor-made to suit • Wide range of spring rates are available

FEATURES STX36P (piggyback)

- Well proven monotube design • Piggyback gas pressurized system • Designed for comfort and rideability
- New black design • Each application tested and tailor-made to suit • Wide range of spring rates are available

FGRT200 Series Road & Track front fork

The Road & Track front fork upgrade from Öhlins improves performance and comfort. A winner on race tracks as well as a fantastic upgrade to improve the ride on your favourite roads. Features the Öhlins 30mm cartridge kit inside, compression and rebound adjustments can be easily done with compression adjustment in one leg and rebound adjustment in the other leg.

FEATURES:

- Öhlins NIX 30mm Cartridge Kit inside • Compression damping in one leg, rebound in the other
- Weight and stress optimized fork bottom design • All adjustments at the top of the fork
- Reduced weight • Proven in various racing applications
- Available for all major Hypersport models
- Different settings available from Öhlins setting bank
- Wide range of springs

TTX25 Pressurised Fork Cartridge Kit

Brought straight from Öhlins vast MotoGP experience, the TTX25 pressurized cartridge kit brings TTX technology to the front end of your bike. Designed for top level racing in SuperStock and SuperSport classes, this high end cartridge kit delivers performance levels previously unheard of. The advanced design maintains damping even at high frequencies, improving control of tire vibrations. Thanks to the pressurized damping system, the dynamics are vastly improved. This results in a superior control over movement, improving response time to sudden shocks. The rider will notice two things: better feedback and more grip.
As an advanced product born and raised on the race track, this kit requires regular maintenance by qualified mechanics to perform at the highest possible level race after race.

FEATURES:
Pressurized damping system
• External rebound, compression and spring pre-load adjusters
• Easy to change settings for individual preferences from Öhlins setting bank • Spring kit included

NIX30 Front Fork Cartridge Kit

The Öhlins Road & Track 30mm front fork cartridge kit was developed in racing series such as World Supersport and Superstock championships. The cartridge kit offers performance, stability and superior suppleness. This kit has a unique design, where the compression damping is taken care of the left fork leg while the other controls rebound damping. This allows not only for a more precise function and better stability, but also the possibility of having all adjustments conveniently placed at the top of the fork, together with the spring preload adjusters. The cartridge kits bolt on and are easy to install in most standard hypersport front forks. PLEASE NOTE: This kit is delivered without springs. The 08790-series of front fork springs are available to order separately to suit the rider's choice of spring rate.

FEATURES:
External rebound, compression and spring preload adjusters • Easy to change settings for individual preferences, based on Öhlins Setting Bank • Wide range of spring rates available in the 08790-series • Easy to install and service • Available for all Hypersport models

ÖHLINS Front End Products - Steering Damper Kits

An essential ingredient in a complete performance package, the Öhlins telescoping steering dampers are still the ones to beat. Thanks to the superior pressurized design and extremely tight manufacturing tolerances, the damper delivers supreme performance and agility, and with the wide adjustment range it is easy to find that perfectly weighted steering feel and feedback.

FEATURES:

- Unique design • Fluid under pressure to avoid free play • Adjustable in 16 clicks
- Six lengths/strokes • Can be mounted outside the fork leg or across the frame behind the triple clamp
- Kits complete with mounting brackets available for certain bike models • Universal parts for race bikes available.

Universal dampers are available in 63mm (SD000), 68mm (SD001), 90mm (SD002) or 120mm (SD003) stroke for £288.75 ex VAT and 140mm (SD004) or 150mm (SD005) stroke for £285.62 ex VAT.

K-Tech Suspension

PDQ are a UK premier dealer for K-Tech Suspension, who for over 20 years have built on their incredible success in global road racing and motocross championships, constantly evolving and providing championship winning products. This is an overview of some of their range.

K-TECH HPFS FORK SPRINGS - From £70.84 ex VAT per pair

K-Tech fork springs are manufactured from the highest grade Chrome Silicone wire, each spring is cold coiled, heat treated, pre set and ground to length before being polished for ultimate performance. All springs have their rate laser etched on the end and are manufactured to DIN 2095 grade1.

All springs are: • Cold Coiled • Ground Ends • Heat Treated • Tempered • Shot Peened • Polished for smoother performance • Part Numbered

K-TECH HPSS SHOCK SPRINGS - From £62.50 ex VAT

K-Tech shock springs are manufactured from the highest grade Chrome Silicone wire, each spring is cold coiled, heat treated, pre set and ground to length, they then have a phosphate coating applied to protect from corrosion and then powder coated before the part number being printed onto them. All springs are manufactured to DIN 2095 grade1.

All springs are: • Cold Coiled • Ground Ends • Heat Treated • Tempered • Shot Peened • Zinc Phosphate • Epoxy Powder Coated • Part Numbered

K-TECH FSS/DSS FORK OIL SEALS & DUST SEALS - From £16.62 ex VAT

K-Tech front fork oil seals are manufactured by NOK and are a direct replacement for the original equipment parts. NOK are chosen as original equipment by all Japanese suspension manufacturers for their quality and durability. All oil seals are supplied in pairs and available for most fitments.

K-TECH GBS/SBS FORK GUIDE BUSHES - From £8.94 ex VAT

K-Tech front fork guide bushes are a direct replacement and manufactured to the exact standards of the original equipment parts. They are manufactured from a hardened steel and coated with copper for protection against outside elements, the wearing surfaces are a PTFE material designed to give low friction on the movement of the front fork. All guide bushes are supplied in pairs and available for most fitments.

SSK KIT

K-TECH SSK Road and Track Piston Kits - From £162.50 ex VAT

K-Tech SSK piston kits are available to fit most front fork cartridge damping systems and have been designed for road and track use to give enhanced damping control over the original equipment, giving comfort and confidence to the rider. All piston kits are supplied as a complete assembly for ease of fitment with new control valves and needles to give a more precise range of adjustment.

• Designed and manufactured in the UK • Tighter tolerance for improved performance over original equipment parts
• Improved adjustment range • Complete assemblies for ease of fitment • Increased comfort and confidence

The SSK Piston kits are only available through K-Tech authorised dealers who have been trained to install these products, there are specialist tools and techniques required to guarantee performance and safety of this product.

K-TECH SSRK Race Front Piston Kits - From £162.50 ex VAT

K-Tech SSRK piston kits are available to fit most front fork cartridge damping systems and have been designed for track use to give enhanced damping control for race level performance. All piston kits are supplied as a complete assembly for ease of fitment with new control valves and needles to give a more precise range of adjustment. It is advised that these piston kits should not be used for normal road riding conditions.

• Designed and manufactured in the UK by race department • Tighter tolerance for improved performance over original equipment parts
• Improved adjustment range • Complete assemblies for ease of fitment • Increase performance and confidence
• Proven track performance.

The SSRK Piston kits are only available through K-Tech authorised dealers who have been trained to install these products, there are specialist tools and techniques required to guarantee performance and safety of this product.

SSRK KIT

FCVs

K-TECH FCV's Fork Flow Control Valves - £62.50 ex VAT

K-Tech Flow Control Valves are available to fit most front fork cartridge damping systems and are designed to use in conjunction with SSK and SSRK piston kits to give a more precise range of adjustment of the compression damping circuit.

• Improved adjustment needle design for more precise adjustment range • Direct replacement of original part
• Adjustment clicks for accurate adjustment

K-TECH IDS Fork Cartridge Kits - From £495 ex VAT (20mm) and £699.95 ex VAT (25mm)

K-Tech 20IDS & 25IDS (Independent Damping System) front fork cartridges are a complete replacement damping system designed to fit into original equipment front forks that do not allow for external compression adjustment. The 20IDS cartridges are designed and manufactured in house to the same standard as all our performance products using the highest grade materials and processes. The 20IDS cartridges have independent compression and rebound damping adjustment and spring preload.

• 30 clicks independent compression adjustment
• 30 clicks independent rebound adjustment
• 18mm preload adjustment
• Hard chrome piston rod
• Aircraft grade aluminium
• Hard anodised and super finished components
• Range of spring rates available

The IDS cartridges are only available through K-Tech authorised dealers who have been trained to install these products, there are specialist tools and techniques required to guarantee performance and safety of this product.

IDS CARTRIDGE KIT

Available for:
Aprilia RSV4 2010-15, Tuono ABS 2013-15, BMW F800GS 2008-13, Ducati 1100 Hypermotard 2013-2015, Harley Davidson XR1200X 2011-2014, Honda CBR500R 2013-2015, Kawasaki Ninja 250R and 300R 2008-2015, ER6N & ER6F 2010-2015, ZX6R 636 2013-2015, Z1000 2014-2015, MV Agusta F3 675cc 2012-2014, F4 1000cc 2009-2012, Suzuki SV650 1999-2009, SFV650 Gladius 2009-2015, Triumph Street Triple 675 2008-2015, Tiger 800XC 2011-2014, Yamaha MT-09 2014-2015, Yamaha YZF R1 2009-2015.

K-TECH RDS Fork Cartridge Kits - From £708.33 ex VAT

K-Tech RDS (Rod displacement damping system) front fork cartridges are a complete replacement damping system designed to fit into original equipment front forks. Designed and manufactured in the UK using the highest grade materials and processes available. The RDS system uses a 14mm piston rod and 25mm control piston for a larger displacement of oil for improved damping performance, providing the rider a race level performance from their original equipment forks.

• 24 clicks compression adjustment • 30 clicks rebound adjustment
• 18mm preload adjustment • 14mm piston rod • 25mm control Piston
• Increased stroke over original equipment • Aircraft grade aluminium • Hard anodised and super finished components • Wide range of spring rates available

The RDS cartridges are only available through K-Tech authorised dealers who have been trained to install these products, there are specialist tools and techniques required to guarantee performance and safety of this product.

RDS KIT

RDS KIT

K-TECH DDS Fork Cartridge Kits - From £1,425 ex VAT

K-Tech DDS (Direct Damping System) front fork cartridges are a complete replacement damping system designed & manufactured in the UK for high end racing applications. The DDS cartridge is a pressurised damping system using 20mm displacing pistons to create a high flow of oil through the 31mm control valves to give precise damping control. The patent design eliminates cavitation making the system very stable under extreme conditions, the damping circuits are designed to work independently to improve the dynamics and response time. The system is pressurised by a spring force keeping it stable under all working temperatures.

• 30 clicks compression • 30 clicks rebound • 18mm spring preload • DDS technology • 8mm piston rod
• 20mm displacing piston • 31mm control piston • Design to eliminate cavitation • Supplied with springs
• Wide range of spring rates • Used in High Level Racing.

The DDS cartridges are only available through K-Tech authorised dealers who have been trained to install these products, there are specialist tools and techniques required to guarantee performance and safety of this product.

DDS KIT

K-TECH Razor-R Shocks - From £495 ex VAT

The K-Tech Razor-R shocks offer refined handling and enhanced performance over the standard equipment. The Razor-R shocks have been designed with quality and performance in mind featuring compression and rebound damping, spring preload and length adjustment to allow owners of middleweight motorcycles to improve their ride with sporty aesthetics and improved performance. Available for the Kawasaki Ninja 300R and the Yamaha MT-09

• Increased performance and control • Compression damping adjustment
• Rebound damping adjustment • Spring preload adjustment • Length adjustment
• Nitrogen filled N2 • Simply bolts on to replace original equipment
• Spring rate options available

K-TECH DDS Lite Rear Shocks - From £750 ex VAT

The K-Tech DDS 'Lite' rear shock has been designed as an entry level product for the customer that demands a high level of performance at a competitive price. Sharing all the same high quality components as the DDS 'Pro' version the DDS 'Lite' performs to the same high level without the hydraulic spring preload adjustment or the 'unique' Bypass Valve adjustment that is found on the 'Pro' version. This shock can be upgraded to the 'Pro' specification at a later date if required.

• 4 way adjustable • 32 clicks compression adjustment • 32 clicks rebound adjustment
• Manual spring preload adjustment • Length adjustment • CNC machined components
• Able to upgrade to 'Pro' specification • Wide range of spring rates available • DDS technology

DDS LITE

DDS PRO

K-TECH DDS Pro Rear Shocks - £995 ex VAT

The K-Tech DDS 'Pro' rear shock has been designed for use at the highest level of racing and developed in major championships around the world. Like all other K-Tech products it has been designed and manufactured in the UK using the latest design software and highest grades of materials. As you would expect from a high quality racing product, the DDS 'Pro' features compression and rebound damping adjustment, length adjustment and hydraulic spring preload adjustment. It also features our unique ByPass Valve adjuster which controls both compression and rebound damping adjustment to assist with chassis control at low velocity shock movement to enhance tyre feel and grip. The DDS system uses a smaller piston rod which keeps the system more stable over a wider temperature range due to its small displacement. Damping is controlled by a 32mm piston which allows the use of larger shims for improved feel.

• 5 way adjustable • 32 clicks compression adjustment • 32 clicks rebound adjustment • 16 clicks BPV adjustment
• Hydraulic spring preload adjustment • Length adjustment • CNC machined components • DDS technology
• Potentiometer mounting points • Wide range of spring rates available
• Used at the highest levels of racing including British Superbike and Isle of Man TT.

Race Tech Suspension Components

Superior suspension is the key to riding with speed and control. Unfortunately, some riders are more concerned with the looks & sound of their exhaust than the performance of their suspension. These riders do not realise the benefits of increased control, a smoother ride and more traction. Paul Thede, Race Tech's founder and chief engineer, has a favourite saying, "The best you've ridden is the best you know".

Superior suspension comes from the careful blending of three components: spring rates, damping curves and friction reduction. Race Tech's springs are measured to the exact tolerance and made of the finest materials. The Gold Valve Kits and Cartridge Emulators precisely control damping curves while Ultra Slick Fluids and coatings are available to reduce friction.

www.racetech.com includes an online Digital Valving Search, where recommended suspension settings are calculated for your model, where you ride, your skill level, and your weight. There is also a Product Search, so you can see which components are available for your particular motorcycle and application.

Race Tech Gold Valve Kits:

There are two types of fork, cartridge forks and damping rod forks. Cartridges are used predominantly on modern sports bikes and road racers. This style of fork offers more precise damping control than the older style damping rod forks. Race Tech produce GOLD VALVE kits to improve the characteristics of cartridge style forks. Race Tech GOLD VALVE CARTRIDGE EMULATORS were invented to give older style damping rod forks the same advantage as well tuned cartridge forks with Gold Valves.

Race Tech Gold Valve Fork Kits: (for cartridge forks)

The fact that you have a cartridge system doesn't necessarily mean that it works well. The stock valving systems can be modified - but they all have major limitations. The solution is GOLD VALVES. By improving the piston design Race Tech valves give outstanding performance and tuneability. As with other GOLD VALVE products these can be installed by any competent mechanic.

Front Fork Gold Valve Kit Prices: Street & dirt bikes from £136.14 ex VAT.
For the ultimate performance use the Gold Valves in conjunction with Race Tech's High Performance Springs & oil.

Race Tech G2-R Fork Gold Valves: (available as an alternative to standard Gold Valves on certain models)

Race Tech's revolutionary new G2-R Gold Valves are dual port pistons made of Billet Aircraft Aluminum then MIL Spec Hard Anodized. G2-R Gold Valves are designed to optimize the loading of the shims while improving flow. These versatile valves blow away all previous limitations, creating traction and a feel like no other valve in the world. G2-R Gold Valves can be preloaded (digressive), freeloaded and/or restricted (progressive).

Available for Dirt, Street, Off-road or Supermoto Fork applications. G2-R Gold Valve Kit Prices: Street & dirt bikes from £136.14 ex VAT. For the ultimate performance use in conjunction with Race Tech's High Performance Springs & oil.

G2R GOLD VALVES

Race Tech Rebound Gold Valve Fork Kits:

Many rebound valving systems are grossly inadequate. No matter what modifications are attempted, the forks will never perform with precision and control. If you race or you simply want the best, Race Tech's Rebound Gold Valves are the solution. Used by many major factory teams. Rebound Gold Valve Kits (Street): from £136.14 ex VAT

High Frequency Rebound Gold Valve Kits: Race Tech's Hi-Frequency Response (HFR) Rebound Gold Valve is specifically designed for racing but can be used for street applications as well. It provides better traction on small or sharp bumps that require fast valve opening and closing at high speeds: from £136.14 ex VAT

Race Tech Gold Valve Emulator Fork Kits: (for damping rod forks)

Damping rod forks have never been known for precise control and maximum traction. Gold Valve cartridge emulators solve this problem. Like the GOLD VALVES above, the EMULATORS allow the suspension to be tailored to your own personal requirements, offering huge improvements whatever your bike and riding style.

Gold Valve Emulators:

Street and dirt bikes from £136.14 ex VAT. For the ultimate performance use the Emulators in conjunction with Race Tech's High Performance Springs & oil.

Race Tech Gold Valve Rear Shock Kits:

Original equipment manufacturers (OEM's) have major limitations including cost, development time and production. Race Tech does not have these limitations because they focus entirely on suspension. The Race Tech Gold Valve is revolutionary and will improve your ride whether it is road use, track days or road racing. Your shock can be turned into a state-of-the-art unit that gives you maximum traction, precise control and faster lap times.

Rear Shock Gold Valve Prices:

Street and dirt bikes from £136.14 ex VAT.
For the ultimate performance use the Gold Valves in conjunction with Race Tech's Rear Shock Springs & oil.

Race Tech High Performance Fork and Shock Springs:

These high performance springs have a high stiffness to mass ratio (they're light!) and they also have very accurate spring rates, unlike mass produced OEM springs. The Race Tech linear front fork springs are available for many different makes and models and in various rates, from .75kg/mm up to 1.2kg/mm depending on weight and style of machine. Rear shock springs are available too, again in different rates depending on your requirements. Please visit the www.racetech.com for recommended spring rate information, or call us.

Front Fork Spring Prices - Street:	From £101.34 ex VAT
Front Fork Spring Prices - Dirt:	From £101.34 ex VAT
Rear Shock Spring Prices - Street:	From £101.34 ex VAT
Rear Shock Spring Prices - Dirt:	From £101.34 ex VAT

Race Tech WP Nitrogen Filler Bolt

SPNV-0512 = £12.22 each ex VAT

WP shocks can be difficult to rebuild because of the stock nitrogen charging system. The SPNV-0512 Nitrogen Charging Bolt replaces the original Allen bolt at the bottom of the reservoir. You will then just need a Nitrogen Needle (TSNN 01) instead of the costly OEM tool.

Dymag Wheels

Founded in the early 1970s, Dymag introduced the world's first 3-spoke Magnesium racing wheels for motorcycles. It was on these very wheels that the legendary Eddie Lawson won the AMA Superbike Championship on a Kawasaki KZ1000-S1 in 1981 and 1982, and went on to win the 1984 World Motorcycle GP Championship on a Yamaha YZR500.

From their early days manufacturing lightweight Cast Magnesium racing wheels, Dymag's technology has evolved through Forged Magnesium and onto the state-of-the-art Carbon Fibre wheels for the latest high performance cars and motorcycles. Many Formula 1, IndyCar, Rally/RAID, Grand Prix, Superbikes, Isle of Man TT champions and race winners have used Dymags, as well as many production SuperCar manufacturers. Reducing unsprung mass (wheels, discs etc) has a far greater performance benefit than reducing sprung mass (bodywork etc). Fitting lightweight wheels will improve braking and acceleration & reduce the gyroscopic effect of the wheel, making the bike easier to flick from side to side. This has a major effect on the handling of a motorcycle.

- Dymag wheels are certified for racing and legal for road use as they are DOT and JWL approved.
- Dymag wheels are available to fit over 90% of all racing and sports bikes from a wide range of manufacturers since the 1970's up to the present day.
- Single sided wheels (RC30, Ducati etc) are available in CARBON 5 and TT3 (3 spoke hollow cast).
- Wheels are available in Classic DYMAG Black Sparkle, Gold, Satin Black, Gloss Black, Anthracite (metallic gunmetal), Silver or Gloss White as standard. Special colours are available subject to additional cost and availability (red, yellow, blue).
- All Wheels come ready to fit including bearings, disc carriers and a rear sprocket. (except on single sided wheels or where stock sprocket carrier is retained)
- Wheels are sold as pairs but can be ordered individually.
- Typical delivery is 4-6 weeks for carbon fibre and UP7X, and 8-10 weeks for magnesium.
- Dymag also offer a complete design package for special motorcycle projects, as well as a full refurbishment service for all motorcycle and car wheels.

3 Spoke Classic H-Section (Classic CH3)

The Classic CH3's are the World's original three spoke Magnesium motorcycle wheels as used by Eddie Lawson. These truly classic H-Section wheels are available for all performance retro-bikes and Harley Davidsons. These stylish, highly durable custom motorcycle wheels will put the finishing touch to any custom classic bike project.

Available Sizes:

Front: 17" x 3.00/3.25/3.50	Rear: 17" x 4.50/4.75/5.00/5.25/5.50/6.00/6.25
Front: 18" x 2.50/2.75/3.00/3.25/3.50	Rear: 18" x 2.5/2.75/3.00/3.25/3.50/3.75/4.00/4.25/4.50 4.75/5.00
Front: 19" x 2.50	Rear: Vmax Specific 17" x 4.00/4.50/5.00

Price for set: £2,800 (ex VAT)
Discontinued in March 2018, but some existing stock may still be available

3 Spoke Hollow Section (Street Race TT3)

The Street Race TT3 range has been designed with performance motorcycle racing, OE and aftermarket applications in mind. These magnesium motorcycle wheels with their hollow spokes design ensure as much weight saving as possible without compromising on durability or performance as proven by their use in the Isle of Man TT Races and World Endurance.

Available Sizes:

Front: 16.5" x 3.00/3.25/3.50/3.63/3.75	Rear: 16.5" x 5.25/5.50/6.00/6.25
Front: 17" x 3.00/3.25/3.50/3.63/3.75	Rear: 17" x 4.00/4.25/4.50/4.75/5.00/5.25/5.50/6.00/6.25
Front: 18" x 2.50/2.75/3.00/3.25/3.50	Rear: 18" x 4.00/4.25/4.50/4.75/5.00

Price for set: £2,900 (ex VAT)
To be discontinued in January 2019, but some existing stock may still be available

Ultralight 7 Spoke Forged Aluminium Sport Wheels (Ultra Pro UP7X)

A stylish Aluminium seven spoke with stiff "U" section spoke design. The UP7X is the next step in the evolution of the successful Dymag UP7 lightweight forged aluminium wheel and is designed to give racers an edge on the track with a lower weight and a lower moment of inertia than previous versions, while still providing the reliability, safety, durability, and longevity that everyday road users need and expect from Dymag wheels.

As well as the huge 25% unsprung weight savings and Moment of Inertia (MOI) reduction of over 25% against the OEM supplied wheels, the UP7X is on average 7% lighter than its predecessor the UP7AL.

The UP7X is available in double sided swinging arm applications in 17x3.50" fronts and 17x6.00" sized rears in a range of different colours.

The UP7X is tested to JWL, BS AU 50, and DOT standards, and is legal for road use worldwide.

Available Sizes:

Front: 17" x 3.50	Rear: 17" x 6.00

Price for set: £1,850 (ex VAT)

5 Spoke Carbon Race (CA5)

The Carbon CA5 motorcycle wheels have been designed with the benefit of 30 years of specialist experience of lightweight wheel technology for both bikes and cars. These stylish ultra-light and ultra-strong one-piece Dymag Carbon 5 Spoke motorcycle wheels will transform your bike's handling and performance. Massive range of fitments available, front and rear for double and single-sided swing arms.

Available Sizes:

Front: 16.5" x 3.50	Rear: 16.5" x 6.25
Front: 17" x 2.50/3.50/3.75	Rear: 17" x 3.50/5.50/6.00
Front: 19" x 3.00	Rear: 18" x 5.00

Price for set: £2,250 (ex VAT)

CA5 Sample Weights:
Front 2.2kg complete and all-inclusive
Rear 2.9kg complete and all-inclusive
(Ducati fitment)

We are now offering spare parts to support every Dymag motorcycle wheel ever manufactured! We can also offer a refurbishment service for magnesium motorcycle wheels whether they are Dymags or other brands. Please contact us for further information.

Why not complete your upgrade with a set of Brembo HPK High Performance front discs. We can supply and fit these to your Dymags before shipping them.

Brembo HPK front disc kits are available from £360 ex VAT per pair.

Goodridge Hoses and Accessories

PDQ are distributors for Goodridge and stock a wide range of fittings and accessories. We can make us special one-off hoses to order from a drawing or sample of the OEM hose using our in house swaging machine. Standard 'off the shelf' brake and clutch line kits are available in a variety of colours and with black or silver stainless ends.

Brake lines with stainless steel fittings, bolts, washers etc from £25.99 + VAT per line
Brake light switches inc washers from £19.60 plus VAT
Lockwire tubs from £18.95 plus VAT

Please call us for more details on 01753 730043

Brembo Brakes

The acknowledged leader in motorcycle brake systems, Brembo's extensive research and development, conducted at both its own test facilities as well as competition events at all levels from Supermoto to Superbikes, F1 and Moto GP, provide unparalleled experience and knowledge. This allows Brembo to produce a wide variety of brake components of the highest specification, these products are supplied to leading teams at every level of competition.

Please call 01753 730043 if you have a specific Brembo requirement.

Brembo Radial Front Brake Master Cylinders

Brembo's radial brake cylinders are used at world and national level by teams including Ducati, Suzuki, Yamaha and Kawasaki. They are the MUST HAVE item on any motorcycle and will instantly improve braking power and consistency over OE cylinders. Suitable for use with single and twin front calipers from 125cc to Superbike. All cylinders require a remote fluid reservoir - unless otherwise mentioned.

Brembo master cylinders are not supplied with any form of brake light switch (except the RCS), so if you are using the master cylinder on the road it is recommended that a hydraulic brake light switch is fitted.

LEVER RATIO GUIDE:
20 ratio lever will give the least travel and be hardest, 18 ratio lever will give more travel & is easier to pull, 16 ratio lever is the easiest to pull & has the most travel.

MASTER CYLINDER SIZE GUIDE:
Single calipers / Supermoto models = 16mm diameter bore size with 18 ratio lever
Twin Discs with Brembo Calipers = 19mm diameter bore with 18 ratio lever
Twin Disc with non-Brembo calipers = 19mm diameter bore with 20 ratio lever

110A26310 - 19mm RCS Brake Master Cylinder - £215.00

The RCS Brembo radial master cylinder brings MOTO GP brake technology to your fingertips! The unique Ratio Click System allows the change of the lever stroke at the twist of a cam. Available for both brake and clutch applications. Lever Ratio can be adjusted between 2 ratios * Patented 'RCS' Ratio Click System * Designed for use with all major sportsbikes * Moto GP-inspired piston assembly * Forged aluminium alloy body * Hard anodised finish * Brake light microswitch included in kit * Part of the HPK range of high performance upgrade kits. See page 102 for RCS Clutch cylinder.

Piston size: 19mm Body Type: Forged Lever Type: Adjustable Ratio 18/20 Lever Colour: Black
Supplied with Brake light switch microswitch (optional)

Spare Parts & Accessories:
110A26398 - Std Length Flip Section - £38.00
110A26396 - Shorty flip section - £38.00
110A26399 - Complete Lever - £110.00
L REMOTE (non brembo) remote adjuster - £49.75
GENUINE BREMBO 110A26384 - Remote Adjuster - £171.82

110C74010 - 19mm RCS Brake Master Cylinder - £260.00

Spec as the original RCS above, but with the addition of three ride modes. The selector operates a cam mechanism to let the user choose between three different responsiveness settings.

In the NORMAL setting, indicated on the master cylinder with the letter N, the bite point starts more gradually, making it suitable for city riding or braking in poor grip conditions. In the SPORT setting, indicated on the master cylinder with the letter S, the beginning of the bite point is shorter than in the N setting. This setting produces a more dynamic response suitable for sportier riding. Lastly, in the RACE setting, indicated on the master cylinder with the letter R, the position of the cam mechanism shortens the initial stage of the bite point even further to produce the same immediate response of the master cylinders used in MotoGP, letting the rider reach the bite point of the brakes instantaneously.

110A26320 - 15mm RCS Brake Master Cylinder - £205.00
110A26330 - 15mm RCS Brake Master Cylinder with short lever - £205.00

Designed for single caliper / supermoto use. Lever Ratio can be adjusted between 2 ratios * Patented 'RCS' Ratio Click System * Moto GP-inspired piston assembly * Forged aluminium alloy body * Hard anodised finish * Brake light microswitch included in kit * Part of the HPK range of high performance upgrade kits.

Piston size: 15mm Body Type: Forged Lever Type: Adjustable Ratio 18/20 Lever Colour: Black
Supplied with Brake light switch microswitch (optional)

Spare Parts & Accessories:
110A26398 - Std Length Flip Section - £38.00
110A26399 - Complete Lever - £110.00
110A26396 - Shorty flip section - £38.00
L REMOTE (non brembo) remote adjuster - £49.75
GENUINE BREMBO 110A26384 - Remote Adjuster - £171.82

110.4760.60 - Cast 19x20 Radial Brake Master Cylinder - £192.50
110.4760.62 - Cast 19x20 Radial Brake Master Cylinder with short lever - £192.50

Designed for non-Brembo calipers, suitable for all Japanese models. A remote reservoir and hydraulic brake light switch must be purchased separately if required.

Piston size: 19mm Lever Ratio: 20 Body Type: Cast Lever Colour: Black

Spare Parts:
110459460 - 20 Ratio standard replacement lever - £38.77
10.7264.31 - 20 Ratio short replacement lever - £32.72

All prices exclude VAT

110.4760.65 - Cast 19x20 Radial Brake Master Cylinder with long flip lever - £225.00
110.4760.67 - Cast 19x20 Radial Brake Master Cylinder with short flip lever - £225.00

Designed for non-Brembo calipers, suitable for all Japanese models. A remote reservoir and hydraulic brake light switch must be purchased separately if required.

Piston size: 19mm Lever Ratio: 20 Body Type: Cast Lever Colour: Black

Spare Parts:
110523115 - 20 Ratio flip up long complete replacement lever - £62.58
X98.A7.E1/E2 - Blade long / blade short - £59.49

110.4760.70 - Cast 19x18 Radial Brake Master Cylinder - £192.50
110.4760.72 - Cast 19x18 Radial Brake Master Cylinder with short lever - £192.50

Designed for use with Brembo calipers, suitable for all European models.
A remote reservoir and hydraulic brake light switch must be purchased separately if required.

Piston size: 19mm Lever Ratio: 18 Body Type: Cast Lever Colour: Black

Spare Parts:
110459461 - 18 Ratio standard (long) replacement lever - £38.77
10.7264.32 - 18 Ratio short replacement lever - £29.74

110.4760.75 - Cast 19x18 Radial Brake Master Cylinder with long flip lever - £225.00
110.4760.77 - Cast 19x18 Radial Brake Master Cylinder with short flip lever - £225.00

Designed for use with Brembo calipers, suitable for all European models. A remote reservoir and hydraulic brake light switch must be purchased separately if required.

Piston size: 19mm Lever Ratio: 18 Body Type: Cast Lever Colour: Black

Spare Parts:
110523116 - 18 Ratio flip up complete replacement lever (long) - £62.58
X98.A7.E2 - Short flip blade - £59.49

110.4760.80 - Cast 16x18 Radial Brake Master Cylinder - £192.50
110.4760.82 - Cast 16x18 Radial Brake Master Cylinder with short lever - £192.50

Designed for use with single disc systems. A remote reservoir and hydraulic brake light switch must be purchased separately if required. Short lever shown.

Piston size: 16mm Lever Ratio: 18 Body Type: Cast Lever Colour: Black

Spare Parts:
110459461 - 18 Ratio standard (long) replacement lever - £38.77
10.7264.32 - 18 Ratio short replacement lever - £29.74

110.4760.85 - Cast 16x18 Radial Brake Master Cylinder with long flip lever - £225.00
110.4760.87 - Cast 16x18 Radial Brake Master Cylinder with short flip lever - £225.00

Designed for use with single disc systems. A remote reservoir and hydraulic brake light switch must be purchased separately if required.

Piston size: 16mm Lever Ratio: 18 Body Type: Cast Lever Colour: Black

Spare Parts:
110523116 - 18 Ratio flip up complete replacement lever (long) - £62.58
X98.A7.E2 - Short flip blade - £59.49

XR.011.71 - Machined 19x18 Radial Brake Master Cylinder with flip up lever - £395.00
XR.011.72 - Machined 19x20 Radial Brake Master Cylinder with flip up lever - £425.00

A remote reservoir and hydraulic brake light switch must be purchased separately if required.

Piston size: 19mm Lever Ratio: 18 or 20 Body Type: Machined Billet Lever Colour: Black

Spare Parts:
110523116 - 18 Ratio flip up complete replacement lever (long) - £62.58
110523115 - 20 Ratio flip up complete replacement lever (long) - £62.58
X98.A7.E1/E2 - Flip up blade only - Long / Short - £59.49

All prices exclude VAT

Brembo Radial Clutch Master Cylinders

Brembo's radial clutch cylinders are available in various bore sizes to suit every application. The smaller the bore the lighter the action, if you are in any doubt which size you need check your OEM cylinder or contact us.

LEVER RATIO GUIDE: 20 ratio lever will give the least travel and be hardest, 18 ratio lever will give more travel and is easier to pull, 16 ratio lever is the easiest to pull & has the most travel.

110A26350 - 16mm RCS Clutch Master Cylinder - £236.50

Piston size: 16mm Body Type: Forged Lever Type: Adjustable Ratio 18/20 Lever Colour: Black

110A26355 - 17mm RCS Clutch Master Cylinder - £236.50

Piston size: 16mm Body Type: Forged Lever Type: Adjustable Ratio 18/20 Lever Colour: Black

110A26370 - 19mm RCS Clutch Master Cylinder - £236.50

Piston size: 19mm Body Type: Forged Lever Type: Adjustable Ratio 18/20 Lever Colour: Black

110A26394 - Std Length Flip Section - £34.54
110A26395 - Complete Lever for RCS Clutch - £100.00

110A26303 - Machined Cable Clutch Assembly 34mm to match RCS radial brake master cylinders (Includes Microswitch) - £145.00

This machined clutch master cylinder is designed specifically to match the Brembo RCS Brake cylinders for bikes with cable operated clutches. Features a flip up lever.

Spare Parts:
Std Length Flip Section - £34.54
Microswitch - B-120441820 - £7.50

Fig. A Fig. B Fig. C

Brembo Rear Brake Master Cylinders

Brembo's universal OEM rear master cylinders all feature 40mm mounting hole centres. They are NOT supplied with pushrods. Some models may require a remote reservoir (available separately).

Fig. A.	Part # 10.4776.10 - OE Rear Cylinder 11mm bore, 90 degree outlet, BLACK	£47.24
Fig. A.	Part # 10.4776.20 - OE Rear Cylinder 13mm bore, 90 degree outlet, BLACK	£38.50
Fig. B.	Part # 10.4776.60 - OE Rear Cylinder 13mm bore, outlet in line with cylinder, BLACK	£38.50
Fig. C.	Part # 10.8505.11 - OE Rear Cylinder 13mm bore, integral reservoir, SILVER	£93.50

Brembo Thumb Brake Master Cylinder 13mm

Brembo Racing's specialist Thumb Operated Rear Brake master cylinder. Machined from solid billet and designed to be mounted underneath the clutch master cylinder. Mounting bracket not included.
Please call for details.

Body Type: Billet Aluminium Piston size: 13mm

X98.57.60 = £1,295.00

Brembo Racing Brake Fluid - LCF600 (500ml) - 04.8164.11 = £18.20

Exclusively for racing use. Brembo Racing LCF 600 plus has been specifically formulated to provide the highest performance under all racing conditions:

- an independently proven low compressibility at high temperatures
- a typical dry boiling point of 316°C (601°F)

Compatible with all Brembo Racing Brake Systems. Can be mixed with other DOT3 and DOT4 racing brake fluids but for maximum performance advantage before filling other types of fluid should be drained from the brake system. Brembo LCF 600 plus must not be used in Brake Systems containing magnesium parts.

Brembo HTC 64T Brake Fluid - (500ml) - 04.8164.20 = £28.25

Exclusively for racing use. Brembo Racing HTC 64T plus has been specifically formulated to provide the highest performance under all racing conditions:

- an independently proven low compressibility at high temperatures
- a typical dry boiling point of 335°C (635°F)

Compatible with all Brembo Racing Brake Systems. It can be mixed with other DOT3 and DOT4 racing brake fluids but for maximum performance advantage, before filling, other types of fluid should be drained from the brake system to avoid diluting the fluid characteristic. Brembo HTC 64T plus must not be used in fluid Brake Systems containing magnesium parts.

Brembo OEM Front Caliper P4 30/34 40mm Goldline

Cast Aluminium Body, 30/34mm pistons
Aluminium pistons, 40mm axial mount
Inc pads.

20.5165.58/68 = £185.16 each

Brembo OEM Front Caliper P4 30/34 65mm Goldline

Cast Aluminium Body, 30/34mm pistons
Aluminium pistons, 65mm axial mount
Inc pads.

20.6800.10/20 = £175.00 each

Brembo OEM Front Caliper P4/34 (4 pad type) 65mm Goldline

Cast Aluminium Body, 34mm pistons
Aluminium pistons, 65mm axial mount
Inc pads.

20.7850.10/20 = £250.10 each

Brembo OEM Front Caliper P4/34 Radial Goldline 100mm mounts

Cast Aluminium Body, 34mm pistons
Aluminium pistons, 100mm radial mount Inc pads.

Gold - 20.8343.11/21 = £278.38 each
Silver - 20.8343.35/45 = £278.38 each

Brembo OEM Rear Caliper P2/32

Typically fitted to pre-2001 Ducati models, plus other Italian machines. Includes brake pads.

Cast Aluminium Body, 32mm pistons, Aluminium pistons, 84mm Axial mount Inc pads.

Gold = 20.5161.43 = £77.00
Black = 20.5161.61 = £89.30

Brembo OEM Rear Caliper P2/32 and P2/34

Typically fitted to Aprilia and also late Ducati machines. Includes brake pads.

Cast Aluminium Body, 32 or 34mm aluminium pistons, 84mm Axial mount, Inc pads.

Gold 32mm pistons = 20B85120 = £100.41
Gold 34mm pistons = 20B85210 = £107.75
Black 34mm pistons = 20.6951.12 = £97.89

Brembo Racing Front Caliper P3034

2 piece, 2 pad racing caliper, CNC machined alu. 30/34mm pistons with racing seals. Quick release pad pin. 40mm Mounts. For use on Brembo or OEM stainless steel wide track discs only. Inc. pads.
(Direct bolt on replacement for bikes fitted with the 20.5165.58/68 cast OEM calipers)

Billet Aluminium body, 30 & 34mm Aluminium pistons 40mm Axial mount. Inc. pads.

20.4756.52/62 = £475.00 each

Brembo Racing Rear Caliper - 2 Piston 24mm

Body Type: Billet Aluminium 2 Piece Piston size: 24mm
Piston Type: Titanium x 2 Mount: 64mm

DOES NOT INCLUDE PADS
Caliper = X20.60.01 = £620.00
Pads = 07.9340.90 = £24.13 per pad

Brembo Racing Rear Caliper - 4 Piston 24mm

Body Type: Billet Aluminium 2 Piece Piston size: 24mm
Piston Type: Titanium x 4 Mount: 64mm

DOES NOT INCLUDE PADS
Caliper = X20.61.01 = £725.00
Pads = 07.9340.20 = £24.13 per pad

Brembo Racing Rear Caliper - 2 Piston 34mm

Body Type: Billet Aluminium 2 Piece Piston size: 34mm
Piston Type: Titanium x 2 Mount: 64mm

DOES NOT INCLUDE PADS
Caliper = X98.88.70 = £860.00
Pads = 07.9340.10 = £24.13 per pad

Brembo Master Cylinder Accessories IMPORTANT - If the master cylinder(s) & caliper(s) you are replacing are NOT Brembo you will need to replace the banjo bolt as Brembo use a special M10 x 1.00 SHORT THREAD BOLT.

1. Remote reservoir 30cm3 - Single hole horizontal mount - B-10.4446.30 = £12.00
2. Remote reservoir 45cm3 - 2 screws on lid, horizontal mount - B-10.4446.61 = £16.32
3. Remote reservoir 20cm3 - round clamp mount - B-10.4446.70 = £11.76
4. Remote reservoir 15cm3 - vertical mount (clutch / rear brake) - B-10.4446.40 = £7.15
5. Remote reservoir 15cm3 - vertical mount (clutch / rear brake) - B-10.4446.50 = £6.50
6. Remote Span Adjuster (various lengths available) = £CALL
7. Reservoir Pipe Clip - B-01.5386.20 = £0.52 each
8. Stainless Banjo Bolt brake light switch SINGLE (10 X 1.00mm) - BL992-31SC = £19.60
   Stainless Banjo bolt brake light switch DOUBLE (10 X 1.00mm) - BL993-31SC = £19.60
   Stainless Banjo bolt SINGLE (no switch) 10 X 1.00mm - 992-03-31SC = £3.66
   Stainless Banjo bolt DOUBLE (no switch) 10 X 1.00mm - 993-03-31SC = £9.55

BREMBO BRAKE RESERVOIR PIPE - B-06.5375.03 = £5.83 per metre (Not Shown)

Front Brake res kit 30cc - 110A26385 = £39.54

Clutch res kit 15cc - 110A26386 = £32.95

CNC machined alloy racing front reservoir kit, angled bracket designed to mount to front of top yoke. Supplied with Brembo reservoir, clips & hose.
B-PDQ-RKIT

Polished £47.00
Black Anodised £50.00
(one supplied)

Brembo Bike Specific Brake Upgrades

(See pages 106 to 111 for exact part number listings)

Brembo HPK T-Drive Disc Kits

A product of experience acquired in SBK and MotoGP, the new T-Drive is the next generation of product reflecting the natural evolution of Brembo brake discs engineered for competition use. The key feature of the new T-drive system is an innovative method of transferring brake torque from disc to wheel, in which the conventional system of cylindrical bobbins are replaced by a set of eight "T" pins on the disc and eight corresponding segments formed in the disc carrier.

Discs are supplied boxed, complete with instructions and stickers.

HPK T-Drive Disc Kits = from £425.00 per pair

Brembo HPK Disc Kits

The Brembo HPK (high performance kit) discs are intended for anyone looking for maximum braking performance from standard wide track components. They are designed to interchange with original equipment parts, for optimum performance use with Brembo HPK Calipers.

HPK discs are available for a wide range of makes/models - please call for part numbers & availability for your model. Discs are supplied boxed, complete with instructions and stickers.

On certain models where the OEM discs are less than 320mm diameter, Brembo offer a 320mm upgrade kit (new/modified caliper spacers & bolts may also be required)

HPK Disc Kits = from £360.00 per pair (except BMW kits with stainless bobbins - £399.00)

Brembo Clubman Racing Discs

Brembo 320mm Clubman racing discs use a 5mm thick high carbon stainless steel rotor fixed to a CNC machined, hard anodised alloy centre with Brembo full floating bobbins. These discs are available in 320mm diameter only, so some models may require spacers in order to move the standard calipers to the correct position. This is a proper performance disc rather than a novelty wave design, the 5mm thick 320mm diameter is the best balance between durability, performance and weight.

Available for: Aprilia RSV1000, various Ducati models, Honda CBR600RR/1000RR, VTR1000, Kawasaki ZX6R & ZX10R, Suzuki GSXR's TL1000S/R, Hayabusa, GSX1400, Yamaha R6, R1 and MT01 models.

Clubman Discs = from £165.00 each (please call for part numbers & availability for your model)

Brembo HPK Rear Disc

Brembo High Performance 220mm rear disc, 4mm thick, stainless steel

Available for: Aprilia, Honda CBR600RR/1000RR, Kawasaki ZX6R & ZX10R, Suzuki GSXR's, Yamaha R6/R1 models.

Brembo HPK Rear Disc = £65.14 - £96.33 each

Brembo Serie Oro Discs (Black anodised disc carriers)

Brembo Serie ORO disc range makes Brembo quality available to everyone for the first time, from scooters to superbikes. Developed very much from racing, they are manufactured to all original dimensions and are designed to directly replace and improve upon your original units. The floating front discs use Brembo high carbon stainless steel rotors, heat treated light alloy centres and the two attach together with spring loaded floating bobbins. The rears are one piece high carbon stainless steel rotors manufactured to original dimensions.

They are available in both front and rear fitments for most modern motorcycles. Most front discs models use 5mm thick rotors for improved performance and durability, and they can be used with all other original equipment parts. (320mm upgrade kits are also available for certain models)

Floating front discs from £144.99 each

Rear discs from £57.12

Brembo M4 Cast Monoblock Radial Caliper Kit

Gravity Forged Aluminium body, 34mm aluminium pistons
Radial mounts, pads included.

220.9885.30 - 100mm Mounts = £475.00 ex VAT (pair)
220A39710 - 108mm Mounts = £475.00 ex VAT (pair)
Also available in BLACK (100mm mount only)

Brembo GP4RS Cast Monobloc Front Brake Calipers 108mm (Set of 2)

Cast aluminum monobloc (1 piece) calipers 4 x 30mm pistons. These are the newer lighter version of M4 Calipers

B-220C78310 - 108mm Mounts (most Japanese Models) = £595.00 ex VAT (pair)

Brembo M50 Cast Monoblock (100mm mounts) Radial Caliper Kit

Cast Aluminium body, 30mm aluminium pistons, radial mounts, pads included.
100mm mount only (most euro models)

220A88510 = 100 mounts (euro models and ZX10R 2016 & H2) = £595.00 ex VAT (pair)

Brembo Hard Anodised CNC Billet 2 piece Radial Caliper Kit

2 Piece Billet Aluminium body, 30/34mm aluminium pistons, radial mounts, pads included.

220A16810 - 100mm Mounts (most Euro Models) = £995.00 ex VAT (pair)
220A01610 - 108mm Mounts (most Japanese Models) = £715.00 ex VAT (pair)
220B01130 - 130mm Mounts (09-14 Yamaha R1) = £795.00 ex VAT (pair)

Brembo GP4 RX Nickel Plated Radial Billet Caliper Kit

2 Piece Billet Aluminium body, 32mm aluminium pistons, radial mounted, pads included.

100mm Caliper Kit (most Euro Models) = 220B01020 = £795.00 ex VAT (pair)
108mm Caliper Kit (most Japanese Models) = 220B01010 = £795.00 ex VAT (pair)
130mm Caliper Kit (09-14 Yamaha R1) = 220B01130 = £795.00 ex VAT (pair)
Pads = 107.9882.10 = £61.71 per caliper

Brembo .484 'Cafe Racer' Radial Billet Caliper Kit

2 Piece Billet Aluminium body, 32mm aluminium pistons, 100/108mm radial mounted, pads included.

100mm Caliper Kit = 220B47310 = £795.00 ex VAT (pair)
108mm Caliper Kit = 220B47320 = £795.00 ex VAT (pair)
Pads = 107.9882.10 = £61.71 per caliper

Brembo HPK Rear Caliper - CNC Billet 2 piston

Available as universal caliper (84mm mounts) or as a kit with bracket to suit Honda CBR, Kawasaki ZX10, Suzuki GSXR or Yamaha R6/R1 models - please call for part numbers & availability for your model. The 84mm mounting centres mean that this caliper is a direct replacement on many European models fitted with a Brembo cast rear caliper as standard.

2 Piece Billet Aluminium body, 34mm aluminium pistons, 84mm mounting centres, pads included.

120A44110 - Rear Caliper Only BRONZE	= £495.00
120A44130 - Rear Caliper Only BLACK	= £495.00
120A44140 - Rear Caliper Only NICKEL PLATED	= £495.00

HPK Cast rear caliper (black) = £125.00 ex VAT
(for use with bracket above if required)

Please call for details of specific spacer/bolt kits for calipers as they will vary depending on your disc set up.

Key to notes:

2 . OEM disc diameter is 320mm, 310mm discs (208.9737.13) May be used by removing the spacers under the brake caliper.
3. OEM disc diameter is 280mm, 300mm discs (208.9737.14) May be used by adding spacers under the brake caliper.
4. OEM disc diameter is 300mm, 320mm discs (208.9737.22) May be used by adding spacers under the brake caliper.
5. OEM disc diameter is 310mm, 320mm discs (208.9737.26) May be used by adding spacers under the brake caliper.
6. Universal mounting caliper kit is without spacer and screws. Please call for further info.
7. The HPK disc kit can not be used along with the OES caliper.
8. Rear calipers fit only with Marchesini wheels. Please contact your distributor for furthers details.
9. ABE approval granted by the German Ministry of Transport on TÜV certification.
10. OEM disc diameter is 310 mm, 320 mm discs (208.9737.12) May be used by adding the spacer under the OEM.
11. OEM disc diameter is 310 mm, 320 mm discs (208.9737.21) May be used by adding the spacer under the OEM.
12. OEM disc diameter is 310 mm, 320 mm discs (208.9737.33) May be used by adding the spacer under the OEM.
13. OEM disc diameter is 298mm, 300mm discs (208.9737.18/19) May be used with minor modification on the brake pads.
14. With 220A88510/220C78310 caliper kit use the 17RCS brake master cylinder.
15. With the HPK disc kit the ABS and TC sensor will not work.

Brembo flip up mechanical clutch lever blade to suit OEM clutch perch (designed to match RCS brake cylinders)

See Page 106 for part codes & application lists - from £112.00 ex VAT

Other RCS Master Cylinder Accessories:

Front Brake reservoir kit 30cc - 110A26385 = £29.95

Clutch reservoir kit 15cc - 110A26386 = £29.95

(These kits include an alloy bracket, reservoir pot, pipe and clips as well as mounting bolts/washers etc. specifically designed for use with the Brembo RCS cylinders)

Brembo RCS Remote Adjuster 110A26384 = £125.00

Brembo LOW DRAG Aero lever for RCS Brake 110A26378 = £48.00

Brembo LOW DRAG Aero lever for RCS Clutch 110A26379 = £48.00

SBS Brake Pads

SBS Friction is a world leading manufacturer of motorcycle brake discs and pads for street, off road and racing. For more than 30 years the aim has been to offer the most complete range of motorcycle brake pads in a variety of friction materials developed to suit specific purposes like street, off-road and racing, based on the philosophy: "The highest performance of brake system technology can only be achieved by selecting the best friction materials".

THE RANGE

HF – Ceramic (Front/Rear)

Stable brake performance for front and rear brake. High level of comfort and long lasting brake pads and rotor friendliness under various conditions such as wet roads, changing temperatures and different brake pressures. Recommended for earlier Sport, Touring and Custom models as well as daily transport and touring on small motorcycles which are mainly not originally equipped with sinter metal brake pads.

LS – Sinter (Rear)

Sinter metal brake lining LS for the rear brake with high thermal stability which in combination with HS for the front brake provides the necessary and expected brake performance. To avoid excessive braking of the rear wheel, the friction level of the LS lining is adjusted to match the friction characteristics of the HS lining, according to the concept of the originally equipped sinter metal brake pads.

Stable brake performance for front and rear brake. High level of comfort and long lasting brake pads and rotor friendliness under various conditions such as wet roads, changing temperatures and different brake pressures.

Recommended for earlier Sport, Touring and Custom models as well as daily transport and touring on small motorcycles which are mainly not originally equipped with sinter metal brake pads.

HS – Sinter (Front)

The perfect combination of fade free brake performance, brake feel and thermal stability, especially developed for sport riding and high loads from heavy motorcycles. The HS lining is rotor friendly, the performance is stable under dry as well as wet conditions and no thermal bedding-in is required. Recommended for new generation high performance, sports, touring and custom motorcycles which are originally equipped with sinter metal brake pads.

RS – Sinter (Front)

Used to be our Top racing pad for Supersport & Superbike back in the late 90's, now it is rated as the ultimate and affordable track day pad for your road & track bike.

DC - Dual Carbon (Front) - FOR RACE USE ONLY

Used by the world's top teams and riders since 2001 introduction to win 7 World Championship titles and numerous of National Championships. DC is the "The choice of Champions" for Superstock, Supersport and Superbike classes.

DS – Dual Sinter (Front) - FOR RACE USE ONLY

Introduced 2007 for World Superbike, Supersport & Endurance, winning the two sprint Championships and doing the complete 24 Hour race distance of Lemans & Bol d'or in its 1st season. DS proved already to be the new standard in brake pad technology for World Championship Racing & Endurance.

SBS Brake Discs

The SBS range of brake discs is developed in accordance with our world famous, recognized SBS disc brake pad range. This means that for most reference numbers in the SBS brake pad range, you can find a corresponding SBS brake disc. SBS brake discs meet KBA requirements and are under KBA and future ECE R90 approval.

THE RANGE

The SBS brake disc range comprises two basic programs, making it easy to choose according to individual needs:

SBS REF 5xxx

The SBS STANDARD disc range includes round or similar standard shape either with fixed or floating construction. The SBS STANDARD range generally corresponds to the originally fitted brake disc.

SBS REF 6xxx

The SBS UPGRADE disc range gives you the opportunity to upgrade your brake discs. With the SBS UPGRADE you can change your standard round/fixed disc into for example a floating or SBS signature contour version etc.

SBS DESIGNS

ROUND

The round shape is the design predominantly used by OEM manufacturers. It is classic, practical and preferred by many riders who want to stand by the original visual appearance of their bike.

SBS SIGNATURE CONTOUR

SBS has developed a signature contour brake disc design. The SBS signature contour adds dynamic visual effects to the brake disc. Further it ensures that the friction material is cleaned off from the disc surface, prevents noise/vibrations and reduces weight.

SBS STANDARD DISC

- Front and rear mounting
- High quality stainless steel with high carbon content
- Low weight
- All fitting dimensions according to originally fitted disc
- Excellent brake performance and stopping power under all conditions
- Long lifetime even when used in aggressive environment
- High comfort level – no noise, no vibrations
- High temperature resistance
- Anticorrosion treatment

SBS UPGRADE DISC

- Front and rear mounting
- High quality stainless steel with high carbon content
- Low weight
- All fitting dimensions according to originally fitted disc
- Excellent brake performance and stopping power under all conditions
- Long lifetime even when used in aggressive environment
- High comfort level – no noise, no vibrations
- High temperature resistance
- Anticorrosion treatment
- Heat-treated alloy or stainless steel center hubs
- For oversized disc, caliper mounting set is included
- All oversized discs are floating
- All the venting slots are designed for best cooling and performance

SBS Brake Pads to suit BREMBO rear calipers

PDQ Motorcycle Developments
Marshgate Trading Estate, Hitcham Road, Taplow,
Berks, SL6 0LX, UK.

Telephone: 01753 730043 (+44 1753 730043)
Email: sales@pdq1.com
www.pdq1.com

Shop and Telephone Sales Hours:
Mon to Fri –8.30am to 5.30pm, Saturdays – 9am to 2pm, Sundays and Bank Holidays – Closed.

Payment Methods:
Credit and debit cards accepted include VISA, Mastercard, VISA Debit. We also accept cheques and postal order made payable to PDQ Motorcycle Developments and cash.

Orders:
Orders can be placed via our website using our secure payment gateway (Sagepay) or via phone, post, e-mail or collected in person from our premises shown in the company details above.

PLEASE NOTE: It is not possible to pay for an item on the website and then collect it at a later date from our retail premises. If you wish to collect an item you must pay 'in person' when collecting. This is a credit card fraud prevention measure. Please call or email if you would like us to reserve an item for collection in store and we will gladly do this.

Orders within the UK:
If the parts are in stock we aim to process and despatch orders received before 2pm 'same day'. This is subject to authorisation of the credit card and completion of any security checks deemed necessary.

1. Most lightweight items weighing less than 1kg are sent with Royal Mail first class post, and many arrive the next day. HOWEVER THIS IS NOT A GUARANTEED NEXT DAY SERVICE. If your item IS urgent, please advise us at the time of ordering and we will send it via the fastest and most reliable method available.
2. Parcels weighing over 1kg are usually sent using a dedicated parcel carrier service (eg DPD).
3. There is a surcharge for items being sent via carrier to certain parts of the UK e.g. Northern Ireland, the Channel Islands, the Isle of Man, North Scotland and the Scottish Isles. Please call or email us for a specific carriage quote if you live in one of these areas.
4. Your first order with us must be delivered to the registered card holder's address. Further orders in the future may be, at our discretion, delivered to a different address to that of the cardholder.
5. We aim to deliver your parts 1-3 working days of despatch, subject to stock in our warehouse. If the parts you have ordered are not in stock we will contact you on receipt of the order and advise you of the estimated delivery date. You may at this time choose to cancel the order if you do not wish to wait for the item to come into stock.
6. Certain items such as shock absorbers and wheels may be 'built to order' by the manufacturer and for this reason may have anything up to a 4-6 week lead time. We will advise you of this upon receipt of your order, but once you have been notified of the order being in progress you only have 7 days in which you may cancel the order, and this must be done in writing (via post or e-mail).

Delivery Charges:
The delivery service that we will choose to ship your order on will depend on the weight, size and total value of the goods. For small items it usually a Royal Mail 'signed for' service and on bigger, bulkier items we tend to use a next day courier such as DPD or Parcel Force.

Delivery charges for Highlands, UK Islands & Overseas Orders:
The delivery charge will depend on the weight and size of the parcel as well as the destination, we will always use the most reliable and economical service available, unless advised that the order is urgent. We will advise you of the shipping charges before processing the order. Please note: We cannot ship aerosol cans to overseas customers.

Oversize and Heavy items:
Large or heavy items may not be able to be shipped using the normal services. We will let you know prior to shipment if any additional charges may be incurred. Typically any orders with a total weight in excess of 20Kg will fall into this category.

Delivery Times:
Average delivery time on items kept in stock is 1-3 working days, but for some special order items delivery can take up to 6 weeks. If the part(s) you have ordered are not in stock we will contact you on receipt of the order and advise you of the estimated delivery date. You may at this time choose to cancel the order and receive a full refund if you do not wish to wait. Most lightweight items weighing less than 1kg are sent with Royal Mail first class post, and many arrive the next day. HOWEVER THIS IS NOT A GUARANTEED NEXT DAY SERVICE. If your item is urgent, please advise us at the time of ordering and we will send it via the fastest and most reliable method available to us.

Additional Taxes / Import Duty:
All items shown in this catalogue are in UK Pounds Sterling (£) and you will be billed in UK Pounds Sterling (£). If UK Pounds Sterling (£) is not the currency in your country, the amount you will actually pay will vary depending upon the exchange rate and any fees that your credit card company charges at the time your transaction is processed. Goods shipped to countries outside of the EU may be subject to local taxes, import duties or customs charges prior to delivery. We suggest you contact your local customs office for further information prior to placing your order. PDQ is not liable for any of these costs.

Channel Islands and Non EU countries:
All orders to the Channel Islands and Non European Union countries will be zero rated for VAT. Most lightweight items weighing less than 2kg can be sent using Royal Mail. Heavier items are sent via Parcel force, UPS or DPD. Please contact us for a shipping quote.

Our Right to cancel:
If for any reason an incorrect price appears in the catalogue or on the website, any orders placed for this item will be cancelled and any monies taken refunded. The customer will first be offered the product at the correct selling price. We try wherever possible to provide accurate information for all the products, and try to keep this information up to date. However, we cannot guarantee the accuracy of the descriptions or images, and cannot accept responsibility for possible errors.

Damaged / Missing / Faulty Items:
If your goods have been damaged in transit or any items are missing you should retain the packaging and contact us within 3 days with as much information as possible in case we need to make a claim via our delivery company. If you believe that the products you have purchased are defective or an error has been made on our part, please contact us as soon as possible. We will issue a returns reference and a returns form. If you are sending the package back to us, please provide us with a description of the fault to aid our inspection team more quickly with the diagnosis of the problem/defect. We will be happy to either replace the product or offer a refund for the value of the goods returned upon receipt and inspection of the items.

Returns:
We want all our customers to be happy with the goods purchased from us. When you buy goods or make a contract for certain services by distance means, e.g. over the internet, by telephone or by mail order, your contract is governed by the Consumer Contracts Regulations 2014. The Regulations give you the right to change your mind and claim a full refund (including postage) up to the point where you receive the goods. After you receive the goods you have 14 working days (beginning the day after you receive the goods) to inspect the goods and, if they are not suitable, return the goods for a full refund. During the 14 day cooling-off period, a customer may cancel their order without giving a reason and without incurring charges or penalties other than charges incurred in returning the goods. You must take care of the goods and return them in their original packaging, complete with any accessories, software, manuals, documentation etc and undamaged.

We will not accept items back that have been fitted to a bike and/or are unfit for resale. Goods must be returned to us in a condition which would be acceptable to our suppliers for return. In addition the supplier has to give a full refund to PDQ before any refund can be offered to the purchaser. PDQ will endeavour to reimburse all received funds within 28 days of receipt of returns.

Special Order Items:
Products not normally stocked by PDQ and advised at being 'special' at the time of ordering, or made to the purchaser's specification (i.e. Nitron Shocks, Dymag Wheels) may only be returned if the goods are faulty or were supplied incorrectly by the manufacturer. Returned items which were specifically imported from abroad may incur the full international return cost back to the manufacturer (subject to the manufacturer accepting the return).

NO RETURNS WILL BE ACCEPTED WITHOUT PRIOR AUTHORISATION FROM PDQ, A VALID RETURNS NUMBER AND A COMPELETED RETURNS FORM

If you wish to return an item, you should contact us immediately by telephone or email. If we agree to a return we will issue a returns reference number and a returns form. When returning an item please ensure you enclose the returns reference number, a proof of purchase (i.e. a copy of the original invoice) and your completed returns form. Please ensure any goods returned to us are adequately packaged to survive transportation back to us and please bear in mind items are returned at the customers own risk and expense (so insuring an expensive item in transit is a good idea).

Pricing:
While every effort is made to ensure that the prices shown in the catalogue & on the website are up to date, prices may change at any time without notification. Please call us for up to the minute information

Prices in the catalogue are shown EXCLUDING UK VAT & DELIVERY

Fitment and use of Products:
We aim to provide excellent technical support and back up on all our products, but ultimately it is your responsibility to ensure that all parts are fitted correctly and that the vehicle is safe to use. If you are in any doubt about the fitment of a particular item please consult a professional mechanic or engineer.

Modified vehicles:
Certain products may not be compatible with vehicles which have been modified from their standard factory specification. If goods ordered by the customer are not compatible due to a previous modification, PDQ may refuse to accept such goods back (depending on the product/ circumstances).

Racing and track day use:
Any parts sold for race use, track riding or competition use will not be covered by warranty.

Retention of Title:
PDQ Motorcycle Developments remains owner of the goods until the price and all other sums owing by the buyer to the seller are paid in full.

Privacy Policy:
PDQ Motorcycle Developments are committed to protecting and respecting any personal information you share with us. To view the full policy please visit www.pdq1.com

PDQ is one of the longest established motorcycle tuning and performance centres in the UK - trading since 1984.

Mail Order

For over 30 years we have supplied mail order tuning parts to retail and trade customers worldwide and always strive to treat our customers as we would wish to be treated ourselves: politely, promptly and with no unnecessary jargon. We won't sell you gimmicks and gadgets that you don't need and always aim to provide top quality products backed up with clear and concise advice for each individual customer's requirements.

All the products we supply have been chosen because we feel that they represent the best in quality and performance. We are constantly expanding our stock range and always aim to carry a good selection of the items listed within the catalogue.

If you don't see what you require in the catalogue, please get in touch as this is only a taster of the range of parts and accessories that we stock. We always aim to offer prompt delivery on our main product lines including: Akrapovič, Yoshimura, Scorpion, Barnett, SBS, Brembo, Dynatek, Dynojet, Dymag, Galfer, Goodridge, GSG Moto, Valter Moto, STM, HM Quickshifters, Hyperpro, K&N filters, K-Tech, Nitron Shocks, Ohlins, Race Tech & TNK parts.

We are well known for our speedy mail order service, so if you place an order before 2pm we will endeavour to ship the parts out the same day.

In House Tuning Services and Performance Packages

We are based to the west of London, near Maidenhead in Berkshire - just 5 mins from J7 of the M4. As well as a huge parts and accessory warehouse we have a showroom, customer waiting area & refreshments, an extensive workshop, a suspension clean room, a machine room and 3 stand alone Dynojet rolling roads in a separate climate controlled dyno tuning cell (one for motorcycles, one for cars and one for Bike Engined Cars and quads).

PDQ can offer complete ride-in-ride-out tuning packages tailored to suit your individual needs, whether it be road racing, track days, every day commuting or touring. We have the facilities on site and trained technicians to fine tune or upgrade virtually every aspect of your bike's performance.

Please contact us on 01753 730043 to discuss any services you may be interested in. We are a Dynojet Approved Power Commander Tuning Centre, Authorised Ohlins Service Centre, Yoshimura Performance Centre and Race Tech Service Centre.
