

Scorpion Exhausts

Scorpion bring together traditional engineering excellence with the latest technology to produce an exciting range of high performance exhausts that all feature GREAT QUALITY, GREAT SOUND & GREAT POWER.

Scorpion obtain new models as soon as they become available. Then it's straight into the Dyno room where the bike is tested with the O.E.M. exhaust still fitted to see where improvements can be made - not just in power and torque, but also ground clearance, ease of fitment, weight saving and looks. Each Scorpion exhaust is specifically designed for the particular application. Scorpion exhausts are designed to boost power, not just at peak revs, but throughout the RPM range, giving better throttle response and improved overall performance - especially in the mid-range. All Scorpion exhausts come with a lifetime guarantee.

Sleeve Materials Available:
ST/STEEL = Polished stainless
Ti = Titanium
Carbon = Carbon Fibre

< Power Cone
A road legal race silencer with flared oval construction for extra ground clearance.

< Serket Parallel
A unique precision formed 6 facet profile and an aerospace derived multi composite claw contoured outlet.

< Serket Taper
A unique precision formed 6 facet tapering profile for improved ground clearance and an aerospace derived multi composite claw contoured outlet.

< Factory
All the performance benefits of a Scorpion silencer but with an OE Plus look, the overall effect faithful to the replaced OE product but with added performance and an understated style.

< Stealth
For bikes with an underseat exhaust fitted as standard the Stealth brings performance gains you can feel and great looks to the business end of the exhaust.

< RP-1 GP
Titanium/carbon fibre construction gives bolt on performance with huge power gains & weight savings over the OE silencer. Designed for race use but is road legal for most applications.

< Carbine Oval
A compact version of the factory silencer, shorter, lighter and more potent. The Carbine is the sawn off shotgun of the Scorpion range.
